The Martian Codex George J. Haas, William R. Saunders, 2009-09-22 In this provocative book *The Cydonia Codex* authors George J. Haas and William R. Saunders use archaeological research discoveries and photographs from NASA and other space programs to document the uncanny similarities between Martian and now extinct Earth cultures. *The Martian Codex* begins with a review of the thirty year history of documenting the famous Face on Mars landform from NASA's first photographs in 1976 to the Mars Reconnaissance Orbiter's HiRISE shots in 2007. Detailed analysis shows it as a split faced structure that precisely resembles a set of masks from a temple in Cerros, Mexico. Part two provides additional examples of two faced and composite structures all over the red planet. Haas and Saunders explore a series of recurring motifs by providing side by side views of the Martian geoglyphs with their terrestrial pre-Columbian counterparts. The results substantiate a commonality between two worlds in that both depict specific gods and characters from the creation mythology of the Mayan people as recorded in the sacred Popol Vuh. This fact based book represents the most persuasive argument yet that extraterrestrials may indeed have appeared on Earth during an earlier era. Death on Mars John E. Brandenburg, PhD, 2014-11-19 New proof of a nuclear catastrophe on Mars. In an epic story of discovery strong evidence is presented for a dead civilization on Mars and the shocking reason for its demise: an ancient planetary scale nuclear massacre leaving isotopic traces of vast explosions that endure to our present age. The story told by a wide range of Mars data is now clear. Mars was once Earth-like in climate with an ocean and rivers and for a long period became home to both plant and animal life including a humanoid civilization. Then for unfathomable reasons a massive thermo-nuclear explosion ravaged the centers of the Martian civilization and destroyed the biosphere of the planet. But the story does not end there. This tragedy may explain Fermi's Paradox: the fact that the cosmos seemingly so fertile and with so many planets suitable for life is as silent as a graveyard. We must immediately send astronauts to Mars to maximize our knowledge of what happened there and learn how to avoid Mars' fate.
