Infinity, Causation, and Paradox Alexander R. Pruss, 2018-07-26 Infinity is paradoxical in many ways Some paradoxes involve deterministic supertasks such as Thomson's Lamp where a switch is toggled an infinite number of times over a finite period of time or the Grim Reaper where it seems that infinitely many reapers can produce a result without doing anything Others involve infinite lotteries If you get two tickets from an infinite fair lottery where tickets are numbered from 1 no matter what number you saw on the first ticket it is almost certain that the other ticket has a bigger number on it And others center on paradoxical results in decision theory such as the surprising observation that if you perform a sequence of fair coin flips that goes infinitely far back into the past but only finitely into the future you can leverage information about past coin flips to predict future ones with only finitely many mistakes Alexander R Pruss examines this seemingly large family of paradoxes in *Infinity Causation and Paradox* He establishes that these paradoxes and numerous others all have a common structure their most natural embodiment involves an infinite number of items causally impinging on a single output These paradoxes he argues can all be resolved by embracing causal finitism the view that it is impossible for a single output to have an infinite causal history Throughout the book Pruss expounds such paradoxes defends causal finitism at length and considers connections with the philosophy of physics where causal finitism favors but does not require discretist theories of space and time and the philosophy of religion with a cosmological argument for a first cause

A. van der Ven, 1998

The picture that pastors have of themselves and of their experiences in the ministry is ambivalent On the one hand they find the pastoral work which they perform meaningful important and relevant On the other hand pastors suffer from chronic stress of some sort caused by different factors on the micro meso and macro level of religion church and society Many pastors experience the modernization and subsequently the secularization process as a very serious problem which negatively influences religious life within the parish Pastors are bowed down by uncertainty over how their work contributes to the parish mission in today's society and even more so by doubts over what that mission is in particular the diaconal mission Which direction can shall should the pastor take if neither the church nor the theological institutions are able to provide him or her with a clear frame of reference an attractive perspective a convincing policy a plausible course of action and a meaningful set of aims goals and objectives There is no alternative but to risk taking responsibility for oneself and choosing one's own course of action To take this risk is not reckless or foolhardy as long as the choices are always informed by a religious self reflection that is open to tradition as well as to the future This allows the pastor to be his own guide to transgress useless customs and habits and cross the boundaries into as yet unknown territory

The task of education must be to provide the foundation that enables the pastor to make those choices and take those risks in a well considered prudent and truly religious manner This study represents not only an interpretative description of some of the education for ministry in today s societal cultural and ecclesiastical context in the western world but also a proposal for a new model the reflective ministry model Bulletin of Philippine Statistics Philippines. Emancipation Peter Kolchin,2024-09-10 In this sequel to his landmark study historian Peter Kolchin compares the transition to freedom after American emancipation with the Russian Great Reforms The two largest transitions from unfree to free labor of the many that occurred in Europe and the Americas during the nineteenth century took place in the United States and in Russia Both occurred in the 1860s and in both the former slaves and serfs strove to maximize their autonomy and freedom while the former masters worked to preserve as many of their prerogatives as possible Both were partially but only partially successful In this magisterial and long awaited work historian Peter Kolchin shows that a more radical break with the past was possible in the United States than in Russia with the Southern freedpeople coming to enjoy republican citizenship whereas Russian peasants remained subjects rather than citizens Both countries saw conservative reactions triumph in the late nineteenth century While this conservatism was common in most emancipations it was especially strong in Russia and the American South in part as a reaction against the major efforts to restructure the social order that went by the name of Reconstruction in the United States and the Great Reforms in Russia
