meanings of words and how they can combine to form larger meaningful units as well as how they can fail to combine when
the amalgamation of a predicate and argument would produce what the philosopher Gilbert Ryle called a category mistake It
argues for a theory in which words get assigned both an intension and a type The book develops a rich system of types and
investigates its philosophical and formal implications for example the abandonment of the classic Church analysis of types
that has been used by linguists since Montague The author integrates fascinating and puzzling observations about lexical
meaning into a compositional semantic framework Adjustments in types are a feature of the compositional process and
account for various phenomena including coercion and copredication This book will be of interest to semanticists
