Kwansech'öng,1975 **Race and Racism in International Relations** Alexander Anievas, Nivi Manchanda, Robbie Shilliam, 2014-10-30 International Relations as a discipline does not grant race and racism explanatory agency in its conventional analyses despite such issues being integral to the birth of the discipline Race and Racism in International Relations seeks to remedy this oversight by acting as a catalyst for remembering exposing and critically re articulating the central importance of race and racism in International Relations Focusing especially on the theoretical and political legacy of W E B Du Bois s concept of the colour line the cutting edge contributions in this text provide an accessible entry point for both International Relations students and scholars into

the literature and debates on race and racism by borrowing insights from disciplines such as history anthropology and sociology where race and race theory figures more prominently yet they also suggest that the field of IR is itself an intellectually and strategic field through which to further confront the global colour line Drawing together a wide range of contributors this much needed text will be essential reading for students and scholars in a range of areas including Postcolonial studies race racism in world politics and international relations theory *Knowledge, Desire and Power in Global Politics* Chengxin Pan, 2012-01-01 China threat or China opportunity like beauty is in the eyes of the beholder Western imaginations of China come under close scrutiny in this book in a new philosophical depth seldom attempted before Dr Pan displays in full force his analytical skills and his mastery of knowledge both East and West Contrary to conventional approaches he takes a step back to exercise a powerful reflective process to watch the China watchers with illuminating results Dr Pan's book deserves wide and careful reading Professor Gerald Chan University of Auckland New Zealand The rise of China is largely seen as either a threat or an opportunity Chengxin Pan exposes both of these representations as expressions of Western fears and desires for certainty and predictability His call for a more reflective and culturally sensitive understanding of China offers an important contribution to one of the big political debates of our time Professor Roland Bleiker University of Queensland Australia This is a brilliant and insightful treatment of Western representations of China with a theoretical framework suggesting they come not only from China itself but also the West Although it is not the first treatment of this topic it is innovative in considering the China threat and China opportunity both aspects of the rise of China are of crucial importance for our times With provocative conclusions it is a truly path breaking contribution to the literature I recommend it highly Emeritus Professor Colin Mackerras Griffith University Australia Pan has produced a book which not only challenges some basic assumptions about the nature of China's rise but more importantly forces us to rethink the very basic starting points of how we know what we know about China Professor Shaun Breslin University of Warwick UK How is the rise of China perceived in the West Why is it often labelled as threat and or opportunity What are the implications of these China imageries for global politics Taking up these important questions this groundbreaking book argues that the dominant Western perceptions of China's rise tell us less about China and more about Western self imagination and its desire for certainty Chengxin Pan expertly illustrates how this desire masked as China knowledge is bound up with the political economy of fears and fantasies thereby both informing and complicating foreign policy practice in Sino Western relations Insofar as this vital relationship is shaped not only by China's rise but also by the way we conceptualise its rise this book makes a compelling case for critical reflection on China watching *Knowledge Desire and Power in Global Politics* is the first systematic and deconstructive analysis of contemporary Western representation of China's rise Setting itself apart from the mainstream empiricist literature its critical interpretative approach and unconventional and innovative perspective will not only strongly appeal to academics students and the broader reading public but also likely spark debate in the field of Chinese
