Buell Jr.,Lee Sigelman,2009-09-01 This second edition of Attack Politics updates Emmett Buell and Lee Sigelman s highly regarded study of negativity in presidential campaigns since 1960 with a substantial new chapter on the 2008 contest between Barack Obama and John McCain That campaign the authors contend proved to be the least negative in the last half century and reinforces their central argument that these campaigns have actually not grown dirtier and more negative since the election of JFK In this new edition Buell and Sigelman address the same questions that guided their research in the original book Who attacked whom How frequently On what issues In what ways And at what point in the race They also update their analysis of whether presidential campaigns have gotten more negative since 1960 whether opposing sides addressed the same issues or avoided subjects owned by the other side and whether trailing candidates wage more negative campaigns than leading candidates The authors expand their analysis well beyond their original research base 17 000 campaign statements extracted from nearly 11 000 news items in the New York Times focusing on both presidential and vice presidential nominees as sources and targets of attacks and examining the actions of surrogate campaigners They also compare their findings with previously published accounts of these campaigns including firsthand accounts by candidates and their confidants Each chapter features echoes from the campaign trail that reflect the invective exchanged by rival campaigns Their new chapter shows that rather than neatly resembling either of their typology s extremes runaways or dead heats the 2008 race began as a dead heat in late summer but began to take on all the characteristics of a somewhat competitive affair by the end of September Campaign discourse that began with an anticipated focus on the Iraq War and other national security issues came to be dominated by concerns about the economic meltdown As the campaign headed toward the home stretch anxiety about the economy seemed to eclipse national security health care immigration and other concerns This shift of emphasis they argue doomed whatever chance McCain had of winning Like the first edition this update of Attack Politics systematically analyzes negative campaigning pinning down much

that has previously been speculated on but left unsubstantiated It offers the best overview yet of modern presidential races and remains must reading for anyone interested in the vagaries of those campaigns

Stereotaxic Coordinates Kadharbatcha S. Saleem,Nikos K. Logothetis,2012-09-01 A Combined MRI and Histology Atlas of the Rhesus Monkey Brain in Stereotaxic Coordinates Second Edition maps the detailed architectonic subdivisions of the cortical and subcortical areas in the macaque monkey brain using high resolution magnetic resonance MR images and the corresponding histology sections in the same animal This edition of the atlas is unlike anything else available as it includes the detailed cyto and chemoarchitectonic delineations of the brain areas in all three planes of sections horizontal coronal and sagittal that are derived from the same animal This is a significant progress because in functional imaging studies such as fMRI both the horizontal and sagittal planes of sections are often the preferred planes given that multiple functionally active regions can be visualized simultaneously in a single horizontal or sagittal section This combined MRI and histology atlas is designed to provide an easy to use reference for anatomical and physiological studies in macaque monkeys and in functional imaging studies in human and non human primates using fMRI and PET The first rhesus monkey brain atlas with horizontal coronal and sagittal planes of sections derived from the same animal Shows the first detailed delineations of the cortical and subcortical areas in horizontal coronal and sagittal plane of sections in the same animal using different staining methods Horizontal series illustrates the dorsoventral extent of the left hemisphere in 47 horizontal MRI and photomicrographic sections matched with 47 detailed diagrams Chapter 3 Coronal series presents the full rostrocaudal extent of the right hemisphere in 76 coronal MRI and photomicrographic sections with 76 corresponding drawings Chapter 4 Sagittal series shows the complete mediolateral extent of the left hemisphere in 30 sagittal MRI sections with 30 corresponding drawings Chapter 5 The sagittal series also illustrates the location of different fiber tracts in the white matter Individual variability provides selected cortical and subcortical areas in three dimensional MRI horizontal coronal and sagittal MRI planes For comparison it also provides similar areas in coronal MRI section in six other monkeys Chapter 6 Vasculature indicates the corresponding location of all major blood vessels in horizontal coronal and sagittal series of sections Provides updated information on the cortical and subcortical areas such as architectonic areas and nomenclature with references in chapter 2 Provides the stereotaxic grid derived from the in vivo MR image
