Board Accountability in Corporate Governance Andrew Keay, 2015-05-15 Within corporate governance the accountability of the board of directors is identified as a major issue by governments international bodies professional associations and academic literature Boards are given significant power in companies and as a consequence it is argued that they should be accountable for their actions Drawing on political science public administration accounting and ethics literature this book examines the concept of accountability and its meaning in the corporate governance context It examines the rationale for making boards accountable and outlines the obstacles and drawbacks involved in providing for accountability The book goes on to examine how current mechanisms for ensuring accountability are assessed in terms of fairness justice transparency practicality effectiveness and efficiency before discussing the ways that accountability might be improved Andrew Keay argues that enhanced accountability can provide better corporate governance helping to reduce the frequency and severity of financial crises and improve confidence in company practice As an in depth study of a key element within the exercise of authority and management in corporate entities this book will be of great use and interest to researchers and students of corporate governance business and management and corporate social responsibility Arizona Hazardous Waste Facility , 1983 Corporate Law and the Theory of the Firm Wm. Dennis Huber, 2020-04-08 Dozens of judicial opinions have held that shareholders own corporations that directors are agents of shareholders and even that directors are trustees of shareholders property Yet until now it has never been proven These doctrines rest on unsubstantiated assumptions In this book the author performs a rigorous systematic analysis of common law contract law property law agency law partnership law trust law and corporate statutory law using judicial rulings that prove shareholders do not own corporations that there is no separation of ownership and control directors are not agents of shareholders and shareholders are not investors in corporations Furthermore the author proves the theory of the firm which is founded on the separation of ownership and control and directors as agents of shareholders promotes an agenda that wilfully ignores fundamental property law and agency law However since shareholders do not own the corporation and directors are not agents of shareholders the theory of the firm collapses The book corrects decades of confusion and misguided research in corporate law and the economic theory of the firm and will allow readers to understand how property law agency law and economics contradict each other when applied to corporate law It will appeal to researchers and upper level and graduate students in economics finance accounting law and sociology as well as attorneys and accountants **The Economist** , 1858 **Annual Report of the Secretary of the Commissioner of Insurance of the State of Wisconsin** Wisconsin.
