Hassan, Hosam Saleh, 2025-03-19 The worldwide waste crisis threatens to bring our cities health and planet to the brink of catastrophe This book delivers a comprehensive exploration of waste management strategies essential for ensuring a sustainable future The volume focuses on solutions that address the complex challenges posed by industrial municipal and bio waste while highlighting future innovations in waste to energy technologies recycling systems and pollution control Waste Management for a Sustainable Future Technologies Strategies and Global Perspectives revolutionizes our understanding of modern waste solutions This groundbreaking work reveals Innovative solutions for managing challenging waste streams from microplastics to e waste Successful case studies of municipal waste management from around the world Practical considerations for implementing sustainable waste systems in both urban and rural contexts This book is a well structured highly insightful and high quality guide based on real examples and modern research Policymakers environmentalists and practitioners alike will find many nuggets that can be acted upon to make trash a resource Waste management is no longer limited to disposal the future of waste management entails constructing a circular economy in which today s trash is tomorrow s raw material Through global perspectives and practical strategies it aims to inspire innovation and collaboration towards a cleaner greener future

Breaking the Silos for Planetary Health Nicole de Paula, 2021-10-16 This book translates the latest theoretical perspectives on the emerging field of Planetary Health Studies into the practical reality of global political decision makers It builds on the scientific data on the impacts of environmental change on human health to propose practical methods for operationalizing planetary health The book maps opportunities for decision makers to break institutional silos and engage with bottom up approaches that can transform planetary health from a global idea into a local reality The analysis frames human health in the Anthropocene an era in which humans have become the most powerful force affecting global ecosystems and reveals new existential risks for humankind Departing from ongoing multilateral efforts to promote sustainability the author s analysis places the agenda of planetary health on the desk of political decision makers still underrepresented at planetary health gatherings Given the pressing need to implement sustainable development policies the book presents planetary health as an overarching framework for global policy targets notably the UN Sustainable Development Goals the Paris Agreement on Climate Change and the post 2020 biodiversity framework under the UN Convention on Biological Diversity The book is timely in offering a concrete road map for practitioners and researchers interested in transforming the concept of planetary health into reality With a collection of success stories the analysis dwells on tools for community engagement opportunities for health professionals training gender empowerment digital health and innovative ways to enhance human well being on a changing planet

Advances in Production Management Systems. Production Management Systems for Volatile, Uncertain, Complex, and Ambiguous Environments Matthias Thürer, Ralph Riedel, Gregor von

Cieminski, David Romero, 2024-09-06 The six volume set IFIP AICT 728 729 constitutes the refereed proceedings of the 43rd IFIP WG 5.7 International Conference on Advances in Production Management Systems APMS 2024 held in Chemnitz Germany during September 8-12, 2024. The 201 full papers presented together were carefully reviewed and selected from 224 submissions. The APMS 2024 conference proceedings are organized into six volumes covering a large spectrum of research addressing the overall topic of the conference: Production Management Systems for Volatile, Uncertain, Complex and Ambiguous Environments. Part I: advancing eco-efficient and circular industrial practices, barriers and challenges for transition towards circular and sustainable production processes and servitized business models implementing the EU green deal challenges and solutions for a sustainable supply chain risk analysis and sustainability in an uncertain system in a digital era. Part II: smart and sustainable supply chain management in the society 5.0 era, human-centred manufacturing and logistics systems design and management for the operator 5.0, inclusive work systems design applying technology to accommodate individual workers' needs, evolving workforce skills and competencies for industry 5.0, experiential learning in engineering education. Part III: lean thinking models for operational excellence and sustainability in the industry 4.0 era, human in command operator 4.0/5.0 in the age of AI and robotic systems, hybrid intelligence decision making for AI-enabled industry 5.0, mechanism design for smart and sustainable supply chains. Part IV: digital transformation approaches in production and management, new horizons for intelligent manufacturing systems with IoT, AI and digital twins. Part V: smart manufacturing assets as drivers for the twin transition towards green and digital business engineering and managing AI for advances in asset lifecycle and maintenance management, transforming engineer-to-order projects, supply chains and systems in turbulent times, methods and tools to achieve the digital and sustainable servitization of manufacturing companies, open knowledge networks for smart manufacturing applications of artificial intelligence in manufacturing intralogistics. Part VI: modelling supply chain and production systems, resilience management in supply chains, digital twin concepts in production and services optimization, additive manufacturing advances in production management systems.

Advances in Biopolymers for Food Science and Technology Kunal Pal, Preetam Sarkar, Miguel Cerqueira, 2024-05-31 Advances in Biopolymers for Food Science and Technology brings together the latest techniques for the preparation of bio-based polymeric materials for novel food applications. The book begins by introducing biopolymers and their various polysaccharide and protein sources, addressing biopolymers from marine sources in particular. Food design using biopolymers and their preparation as gels and composites are then discussed in detail. This is followed by in-depth chapters guiding the reader through specific applications including fat replacement products, delivery systems, food emulsions, micro and nano encapsulation, nanovehicles, nanostructures, nanofilms, antimicrobial peptides, food coatings, food packaging, smart monitoring, cryoprotection and cultured meat production. Finally, the various challenges regarding sustainability of food packaging are addressed. This is a valuable resource for researchers and advanced students across polymer science, food science, chemistry, packaging, nanotechnology.

and materials science as well as industrial scientists and R D professionals with an interest in biopolymers for advanced applications in food products and packaging Covers biopolymers from a range of sources and their preparation as composites gels and coatings Explores applications across food structure design smart packaging systems encapsulation and nutraceuticals Offers case studies and analyzes experimental data on biopolymeric materials for food applications

Advances on Mechanics, Design Engineering and Manufacturing V Cristina Manchado del Val,Ramón Miralbes Buil,Guillermo Peris Fajarnés,María Moncho Santonja,Caterina Rizzi,Lionel Roucoules,2025-05-03 This book contains the papers presented at the International Joint Conference on Mechanics Design Engineering innovative design and computer aided design Further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and nautical engineering and construction aeronautics and aerospace design and modeling The book is divided into six main sections reflecting the focus and primary themes of the conference The contributions presented in this book will not only provide researchers engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work but also stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations
