The Role of GIS in COVID-19 Management and Control Esra Ozdenerol, 2023-05-04 Geographic Information System

GIS is one of the most important tools to help us understand public health and many aspects of our lives. Because of COVID 19, GIS has been brought into the spotlight more than ever before. People and civic leaders worldwide are turning to maps and real time surveillance data to make sense of what has been happening in the world and to get answers to important questions on every aspect of this pandemic. This book examines the role of GIS in managing and controlling the spread of COVID 19 through 12 global projects and a multidisciplinary approach. It explains the innovative uses of GIS, not only limited to data organization and data access, but also how improved GIS tools are used to make decisions, plan and communicate various measures of control in both local and full scale outbreaks during the COVID 19 pandemic. Features: Provides cutting edge GIS visualization, spatial temporal pattern and hot spot tracking applications used for predictive modeling of COVID 19. Includes real world case studies with broad geographic scope that reflect COVID 19 trends in cases, deaths and vaccinations. Provides lifestyle segmentation analysis on the risk of transmission of COVID 19 and spatial patterns of vaccination hesitancy. Highlights real world issues brought to light with the help of GIS, such as social discrimination, inequalities in women's access to mental health care, and analyzes the risk of transmission due to vaccination hesitancy. Shows the use of GIS and spatial analysis in pandemic mapping, management and control, from masking and social distancing to testing site locations, accounting for at risk and vulnerable populations. Discusses facilitating policy making with GIS. Edited by a very talented medical geographer and GIS Professor, Dr. Esra Ozdenerol, this book highlights key GIS capabilities and lessons learned during the COVID 19 response that can help communities prepare for the next crisis. It is a great resource for industry professionals and experts in health care, public health and safety, disaster management, and for students, academics, and researchers interested in applying GIS and spatial analysis to the study of COVID 19 and other pandemics.
