Moore,2014-07-08 This book is presented primarily to record the papers of the Conference on the Exploding Wire Phenomenon conducted by the Air Force Cambridge Research Center in Boston Massachusetts on April 2 and 3 1959 A second and scarcely less important purpose of this book is to serve as a monograph on exploding wires Nowhere in any language is there a book or for that matter a section of a book on electrical wire explosions The growing interest in and importance of the phenomenon was indicated by the very gratifying response to the Conference invitations We hope this book reaching an even larger audience will fill a gap in the literature as well as serve as a record of the Conference A logical arrangement of the papers was extremely difficult to accomplish On whatever basis they were classified most papers could have been equally well placed in more than one category This difficulty was solved by arranging them in three broad classes If this book is to serve as a monograph some general background in the exploding wire phenomenon EWP is needed The Introduction was written to serve this purpose It is of course impossible to thank all those without whose help the Conference and this book would not have been possible **Handbook of Agricultural Charts** , *Agriculture Handbook* ,1968 **Report Upon the Commercial Relations of the United States with Foreign Countries** United States.
