Yearbook of the United States Department of Agriculture ,1913 Viruses and Human Cancer T.-C.

Wu,Mei-Hwei Chang,Kuan-Teh Jeang,2020-11-17 This book in a new extensively updated edition covers viral infection virus induced inflammation and tissue injuries viral epidemiology oncogenic mechanisms and current and emerging preventive and therapeutic strategies in detail Readers will also find information on the individual aspects of a number of oncogenic viruses including hepatitis B hepatitis C human papillomavirus Epstein Barr virus human T cell lymphotropic virus Kaposi sarcoma associated herpes and Merkel cell polyomavirus as well as associated human cancers The book will benefit all those who are seeking a comprehensive up to date overview of the basic and clinical aspects of oncogenic viruses and associated human cancers Following its original publication in 2014 the first edition of this book quickly became an influential text in the field This second edition duly reflects the significant advances in knowledge and research that have been achieved in the years since Yearbook of Agriculture ,1913 Diacylglycerol Kinase Signalling Isabel Merida,Andrea Graziani,Fumio Sakane,2017-11-23 Diacylglycerol kinases DGKs phosphorylate diacylglycerol DG catalyzing its conversion into phosphatidic acid PA This reaction attenuates membrane DG levels limiting the localization activation of signaling proteins that bind this lipid Initially recognized as modulators of classical and novel PKC family members the function of the DGK has further expanded with the identification of novel DG effectors including Ras Guanyl nucleotide releasing proteins RasGRP and chimaerin Rac GTPases The product of the DGK reaction PA is also a signaling lipid that mediates activation of multiple proteins including the mammalian target of rapamycin mTOR The DGK pathway thus modulates two lipids with important signaling properties that are also key intermediates in lipid metabolism and membrane trafficking The DGK family in eukaryotes comprises 10 different members grouped into five different subfamilies characterized by the presence of particular regulatory motifs These regions allow the different DGK isoforms to establish specific complexes and or to be recruited to specific subcellular compartments The subtle regulation of DG and PA catalyzed by specific DGKs is sensed by a restricted set of molecules providing the means for spatio temporal regulation of signals in highly specialized cell systems In the recent years multiple studies have unveiled the functions of specific isoforms their mechanisms of regulation and their participation in different pathways leading to and from DG and PA Animal models have greatly helped to understand the specialized contribution of DGK mediated signals particularly in the immune and central nervous systems Mice deficient for individual DGK isoforms show defects in T and B cell functions dendritic spine maintenance osteoclast and mechanical induced skeletal muscle formation Studies in flies and worms link DGK mediated DAG metabolism with mTOR mediated regulation of lifespan and stress responses In plants DGK mediated PA formation contributes to plant responses to environmental signals Aberrant DGK function has been recently associated with pathological states an expected consequence of the essential role of these enzymes in the regulation of multiple tissue and systemic functions DGK mutations deletions

have been related to human diseases including diabetes atypical hemolytic uremic syndrome Parkinson disease and bipolar disorders On the contrary DGK upregulation emerges as a non oncogenic addition of certain tumors and represents one of the main mechanism by which cancer evades the immune attack As a result the DGK field emerges an exciting new area of research with important therapeutic potential

Trade Promotion Series, 1925 *Mass Shootings* Jaclyn Schildkraut, H. Jaymi Elsass, 2016-02-22 This book provides readers and researchers with a critical examination of mass shootings as told by the media offering research based factual answers to oft asked questions and investigating common myths about these tragic events When a mass shooting happens the news media is flooded with headlines and breaking information about the shooters victims and acts themselves What is notably absent in the news reporting are any concrete details that serve to inform news consumers how prevalent these mass shootings really are or are not when considering crime statistics as a whole what legitimate causes for concern are and how likely an individual is to be involved in such an incident Instead these events often are used as catalysts for conversations about larger issues such as gun control and mental health care reform What critical points are we missing when the media focuses on only what people want to hear This book explores the media attention to mass shootings and helps readers understand the problem of mass shootings and public gun violence from its inception to its existence in contemporary society It discusses how the issue is defined its history and its prevalence in both the United States and other countries and provides an exploration of the responses to these events and strategies for the prevention of future violence The book focuses on the myths purported about these unfortunate events their victims and their perpetrators through typical U S media coverage as well as evidence based facts to contradict such narratives The book s authors pay primary attention to contemporary shootings in the United States but also discuss early events dating back to the 1700s and those occurring internationally The accessible writing enables readers of varying grade levels including laypersons to gain a more in depth and accurate understanding of the context of mass shootings in the United States As a result readers will be better able to contribute to meaningful discussions related to mass shooting events and the resulting responses and policies
