Diversity in Black Greek Letter Organizations Wendy Marie Laybourn, Devon R. Goss, 2018-04-17 Starting in the early twentieth century and still thriving in the contemporary era Black Greek letter organizations BGLOs provide social

support networking opportunities and service for the Black community Although BGLOs have always been majority Black organizations there are small numbers of non Black individuals who choose to pledge their membership Diversity in Black Greek Letter Organizations Breaking the Line explores the experiences of these non Black members who have immersed themselves in organizations rich with Black history and culture Through in depth interviews with thirty four such members Wendy Marie Laybourn and Devon R Goss reveal how and why these individuals come to identify with organizations designed for the uplift of races other than their own For non Black BGLO members the association with a Black organization provides them the opportunity to consider the meaning of racial inequality and their own racial identities Although many non Black BGLO members recount challenges to their membership the participants in Diversity in Black Greek Letter Organizations ultimately find a sense of belonging with their Black brothers and sisters which Laybourn and Goss argue can provide an example of the challenges and promises of cross racial interactions as a whole

Media Control

Robert E. Gutsche, Jr., 2017-04-20 Media Control News as an Institution of Power and Social Control challenges traditional

and even some radical perceptions of how the news works While it s clear that journalists don t operate objectively reporters don t just cover news but they make it Media Control goes a step further by arguing that the cultural institution of news approaches and presents everyday information from particular and dominant cultural positions that benefit the power elite From analysing how the press operate as police agents by conducting surveillance and instituting social order through its coverage of crime and police action to bolstering private business and neoliberal principles by covering the news through notions of boosterism Media Control presents the news through a cultural lens Robert E Gutsche Jr introduces or advances readers applications of critical race theory and cultural studies scholarship to explore cultural meanings within news coverage of police action the criminal justice system and embedding into the news democratic values that are later used by the power elite to oppress and repress portions of the citizenry Media Control helps the reader explicate how the power elite use the press and the veil of the Fourth Estate to further white ideologies and American Imperialism **Cities, Change,**

and Conflict Nancy Kleniewski,Alexander R. Thomas,2019-02-25 Cities Change and Conflict was one of the first texts to embrace the perspective of political economy as its main explanatory framework and then complement it with the rich contributions found in the human ecology perspective Although its primary focus is on North American cities the book contains several chapters on cities in other parts of the world including Europe and developing nations providing both historical and contemporary accounts on the impact of globalization on urban development This edition features new coverage of important recent developments affecting urban life including the implications of racial conflict in Ferguson Missouri and elsewhere recent presidential urban strategies the new waves of European refugees the long term impacts of the Great Recession as seen through the lens of Detroit s bankruptcy new and emerging inequalities and an extended look into Sampson s Great American City Beyond examining the dynamics that shape the form and functionality of cities the text surveys the experience of urban life among different social groups including immigrants African Americans women and members of different social classes It illuminates the workings of the urban economy local and federal governments and the criminal justice system and also addresses policy debates and decisions that affect almost every aspect of urbanization and urban life **Cosmopolitics and Biopolitics. Ethics and Aesthetics in Contemporary Art** Modesta Di Paola,2018-03-19

Cosmopolitics and Biopolitics seeks to trace cosmopolitical aesthetics understood not only as the union of art science and the right to survive but also as the prism through which artistic practices are developed around questions connected to transculturality migration nomadism post gender subjectivities social and natural sustainability and new digital technologies This book s authors fashion a narrative that moves in the territory of inbetweenness between hospitality and hostility between welcoming and conflict between languages and intermediate languages science and survival in a world that is common more than global Contested Issues in Troubled Times Peter M. Magolda,Marcia B. Baxter Magolda,Rozana Carducci,2023-07-03 Contested Issues in Troubled Times provides student affairs educators with frameworks to

constructively think about and navigate the contentious climate they are increasingly encountering on campus The 54 contributors address the book's overarching question How do we create an equitable climate conducive to learning in a dynamic environment fraught with complexity and a socio political context characterized by escalating intolerance incivility and overt discrimination Rather than attempting to offer readers definitive solutions this book illustrates the possibilities and promise of acknowledging multiple approaches to addressing contentious issues articulating a persuasive argument anchored in professional judgment listening attentively to others for points of connection as well as divergence and drawing upon new ways of thinking to foster safe and inclusive campuses Among the issues this volume addresses are such topics as sexual violence historically underrepresented racial and ethnic groups transgender and undocumented students the professional skills knowledge and or dispositions needed to thrive and facilitate systemic change in contemporary higher education organizations the implications of maintaining personal and professional identities via social media and self care In this companion volume to *Contested Issues in Student Affairs* whose issues remain as relevant today as they were upon publication in 2011 a new set of contributors explore new questions which foreground issues of equity safety and civility themes which dominate today's higher education headlines and campus conversations The book concludes with calls to action encouraging student affairs educators to exhibit the moral courage needed to critically examine routine practices that unknowingly perpetuate inequity and enact the foundational values and principles upon which the student affairs profession was founded

Cities in the Urban Age Robert A. Beauregard, 2018-03-19 We live in a self proclaimed Urban Age where we celebrate the city as the source of economic prosperity a nurturer of social and cultural diversity and a place primed for democracy We proclaim the city as the fertile ground from which progress will arise Without cities we tell ourselves human civilization would falter and decay In Cities in the Urban Age Robert A Beauregard argues that this line of thinking is not only hyperbolic it is too celebratory by half For Beauregard the city is a cauldron for four haunting contradictions First cities are equally defined by both their wealth and their poverty Second cities are simultaneously environmentally destructive and yet promise sustainability Third cities encourage rule by political machines and oligarchies even as they are essentially democratic and at least nominally open to all And fourth city life promotes tolerance among disparate groups even as the friction among them often erupts into violence Beauregard offers no simple solutions or proposed remedies for these contradictions indeed he doesn't necessarily hold that they need to be resolved since they are generative of city life Without these four tensions cities wouldn't be cities Rather Beauregard argues that only by recognizing these ambiguities and contradictions can we even begin to understand our moral obligations as well as the clearest paths toward equality justice and peace in urban settings
