U.S. Census of Agriculture, 1959, 1962 **Summus Mathematicus et Omnis Humanitatis Pater** Anja-Silvia Goeing, 2013-10-24 This book revises the picture of the teacher and educator of princes Vittorino Rambaldoni da Feltre c 1378 Feltre 1446 Mantua taking a completely new approach to show his work and life from the individual perspectives created by his students and contemporaries From 1423 to 1446 Vittorino da Feltre was in charge of a school in Mantua where his students included not only the offspring of Italy's princes but also the first generation of authors dealing with books in print Among his students were historians like Bartolomeo Sacchi named Platina who wrote an extensive history of the popes and mathematicians like Jacopo Cassiano Cremonensis who translated the work of Archimedes from Greek into Latin Vittorino is still regarded as the educationalist of Italian Renaissance humanism per se This work not only contributes to the study of the history of Italian humanist institutions it also uses available sources to demonstrate the development of a new attitude to education in Italy **United States Census of Agriculture, 1959**, 1961 *U.S. Census of Agriculture: 1959: General report; statistics by subjects* United States. Bureau of the Census, 1960 **United States Census of Agriculture: 1959: General report. Introd., chapter 1-** United States. Bureau of the Census, 1962 *Laws Relating to the Navy, Annotated* United States, 1946 **Monthly Benefit Statistics**, 1984 **Measuring Damages in the Law of Obligations** Sirko Harder, 2010-07-12 This book challenges certain differences between contract tort and equity in relation to the measure in a broad sense of damages Damages are defined as the monetary award made by a court in consequence of a breach of contract a tort or an equitable wrong In all these causes of action damages usually aim to put the claimant into the position the claimant would be in without the wrong Even though the main objective of damages is thus the same for each cause of action their measure is not While some aspects of the measure of damages are more or less harmonised between contract tort and equity e.g causation in fact and mitigation significant differences exist in relation to 1 remoteness of damage which is the question of whether when and to which degree damage needs to be foreseeable to be recoverable 2 the compensability of non pecuniary loss such as pain and suffering distress and loss of reputation 3 the effect of contributory negligence which is the victim's contribution to the occurrence of the wrong or the ensuing loss through unreasonable conduct prior to the wrong 4 the circumstances under which victims of wrongs can claim the gain the wrongdoer has made from the wrong and 5 the availability and scope of exemplary or punitive damages For each of the five topics this book examines the present position in contract tort and equity and establishes the differences between the three areas It goes on to scrutinise the arguments in defence of existing differences The conclusion on each topic is that the present differences between contract tort and equity cannot be justified on merits and should be removed through a harmonisation of the relevant principles **U. S. Census of Agriculture: 1959** United States. Bureau of the Census, 1962 *An Annotated Bibliography of the Fish and Wildlife Resources of Galveston Bay, Texas: Subject index* Steven P.
