Patterns of Economic Change by State and Area Mary Meghan Ryan, 2013-12-16 Patterns of Economic Change by State and Area Income Employment and Gross Domestic Product is a special edition of Business Statistics of the United States Patterns of Economic Change This book presents data on personal income employment and gross domestic product for the United States as a whole the seven regions each state and 366 metropolitan statistical areas MSAs Data on personal income and employment extends back to 1958 for the states and regions and to 1969 for the MSAs Mortality Statistics, 1906 *Banking Almanac*, 1964 Money, Power, and Influence in Eighteenth-Century Lithuania Adam Teller, 2016-09-21 It has often been claimed that Jews have a penchant for capitalism and capitalist economic activity With this book Adam Teller challenges that assumption Examining how Jews achieved their extraordinary success within the late feudal economy of the eighteenth century Polish Lithuanian Commonwealth he shows that economic success did not necessarily come through any innate entrepreneurial skills but through identifying and exploiting economic niches in the pre modern economy in particular the monopoly on the sale of grain alcohol Jewish economic activity was a key factor in the development of the Polish Lithuanian Commonwealth and it greatly enhanced the incomes and thereby the social and political status of the noble magnates including the powerful Radziwi family In turn with the magnates backing Jews were able to leverage their own economic success into high status in estate society Over time relations within Jewish society began to change putting less value on learning and pedigree and more on wealth and connections with the estate owners This groundbreaking book exemplifies how the study of Jewish economic history can shed light on a crucial mechanism of Jewish social integration In the Polish Lithuanian setting Jews were simultaneously a despised religious minority and key economic players with a consequent standing that few could afford to ignore Report of the Committee Established in Pursuance of Resolution 253 (1968) of 29 May 1968 United Nations. General Register Office, 1963 Revisiting Recent Productivity Developments Across OECD Countries Les Skoczylas, Bruno Tissot, 2005 This paper compares productivity developments across industrial countries based on official OECD data in the business sector It discusses the uncertainties surrounding the measurement of both productivity levels and productivity growth and then focuses on changes in productivity growth The paper analyses labour productivity patterns and trends of total factor productivity TFP across countries The recent performance of the United States clearly stands out In particular the level of US labour productivity appears to be the highest among the major industrial countries and has been rising the fastest in the recent past Despite substantial uncertainties surrounding these international comparisons there is little doubt that the US performance has improved sharply in relative terms Productivity has accelerated in the United States but decelerated in most other industrial economies Indeed only a few countries have experienced a structural improvement in their productivity performance over recent years

Moreover rather than just reflecting stronger capital accumulation the US performance has been associated with a higher rate of technological progress that was maintained during the latest recession In contrast the accumulation of capital has been quite strong in most other major industrial economies This might be a source of concern in some places given the observed trend decline in the rate of technical progress
