Aftermath Yutaka Tsujinaka, Hiroaki Inatsugu, 2018 *Aftermath Fukushima and the 3 11 Earthquake* is a comprehensive analysis of recovery and reconstruction following the triple disaster in Japan on March 11 2011 This collection addresses the question of why despite the relative success of network governance in brokering a response to the disaster and to reconstruction politics failed either to prepare for the disaster or to respond adequately to it In examining Japan's political system leading up to 3 11 *Aftermath* looks at the system of network governance that operated between various organizations and levels of government The book scrutinizes the political influence network that united politicians and the bureaucracy with the major corporations and created a system to promote nuclear power Through political policy economic and social analysis *Aftermath* aims to contribute to the development of mechanisms and structures to minimize the impact of disasters Series Japanese Society Series Subject Politics Governance Japanese Studies Nuclear Studies [The Routledge International Handbook of Walking](#) C. Michael Hall, Yael Ram, Noam Shoval, 2017-07-28 Walking is an essentially human activity From a basic means of transport and opportunity for leisure through to being a religious act walking has served as a significant philosophical literary and historical subject Thoreau's 1851 lecture on Walking or the Romantic walks of the Wordsworths at Grasmere in the early 19th Century for example helped create a philosophical foundation for the importance of the act of walking as an act of engagement with nature Similarly and sometimes inseparable from secular appreciation pilgrimage trails provide opportunities for finding self and others in the travails of the walk More recently walking has been embraced as a means of encouraging greater health and well being community improvement and more sustainable means of travel Yet despite the significance of the subject of walking there is as yet no integrated treatment of the subject in the social science literature This handbook therefore brings together a number of the main themes on the study of walking from different disciplines and literatures into a single volume that can be accessed from across the social sciences It is divided into five main sections culture society and historical context social practices perceptions and behaviours hiking trails and pilgrimage routes health well being and psychology and method planning and design Each of these highlights current approaches and major themes in research on walking in a range of different environments This handbook carves out a unique niche in the study of walking The international and cross disciplinary nature of the contributions of the book are expected to be of interest to numerous academic fields in the social and health sciences as well as to urban and regional planners and those in charge of the management of outdoor recreation and tourism globally *The Foreign Commerce and Navigation of the United States for the Year Ending ...*, 1903 **Congressional Serial Set**, 1958 **The Monthly Army List** Great Britain. Resilience Christopher Williams, Jacqueline Jing You, 2021-07-11 Organizing for Resilience provides a fresh and novel insight into research on how leaders can prepare their organizations to face up to shocks and disruptions in a turbulent and unpredictable world. It provides an analysis of the topic of organizational resilience in a comprehensive and integrative way with fresh theoretical and research implications as well as important implications for leaders. The first book to synthesize themes from across a spectrum of resilience using the metaphor of a resilience landscape, chapters in Part I are devoted to five analytical levels: individual level resilience, small firms in which major disruption can threaten survival, large firms with disruptions in one part of the organization, large firms facing enterprise-wide disruption, and disruption to a complete community or economic ecosystem of individuals and organizations. Cases and practice insights are presented to bring the topics to life, allowing reflection and debate at each level. In Part II, the construct of the resilience landscape is developed along with a discussion on leadership for resilience by instilling a resilience mind set and developing capabilities in relational resilience. The book is ideally suited to bachelor's and master's degree courses on strategy, organizational behaviour, and leadership. PhD and DBA researchers in the field of resilience and strategy will also find the book useful, as will practising consultants and business leaders.
