Page's Ohio Revised Code Annotated Ohio,1953 **For the Health of the Enslaved** Niklas Thode Jensen,2012 In the first half of the 19th century the safeguarding of the health of the enslaved workers became a central concern for plantation owners and colonial administrators in the Danish West Indies With the end of the slave trade the longstanding excess mortality in the hardworking enslaved population became a crucial problem for the colony because the slaves could no longer be replaced This book explores the health conditions of the enslaved workers and the health policies initiated by planters and the colonial government The investigation reveals that in a comparative Caribbean perspective Danish West Indian health policies were often quite unique and efficient but also that the health of the enslaved was a contested field showing an ongoing power struggle between the planters the colonial administration and the slaves themselves The Elements and Dynamic Systems of Economic Growth and Trade Models Bjarne S. Jensen,2025-04-15 This updated and expanded book examines the fundamentals of economic growth models as expressed by dynamic systems of nonlinear differential equations With homogeneous dynamic systems as the unifying mathematical framework the time paths and long run stability properties of the solutions to classical neoclassical and modern macroeconomic growth models are analyzed The general structure and solutions of two sector and multi sector growth models are also explored with special attention given to the evolution of output compositions and sectoral factor allocations involved in Walrasian general equilibrium dynamics Ramsey optimal growth saving models with variable intertemporal substitution non homothetic utility are discussed to demonstrate the ability to generate a realistic historically observed evolution of economic per capita growth rates and saving rates The book aims to highlight how basic economic growth models can be extended widely including international trading economies world market prices commodity trade patterns and issues related to globalization migrations and international factor movements It will be relevant to students and researchers interested in economic growth and trade policy
