Mullins,2008-09-07 Everybody loves a good doughnut The magic combination of soft dough hot oil and sugar coating with or without sprinkles inspires a wide range of surprisingly powerful memories and cravings Yet we are embarrassed by our desire the favorite food of Homer Simpson caricatured as the dietary cornerstone of cops a symbol of our collective descent into obesity doughnuts are in the words of one California consumer a food of shame Paul Mullins turns his attention to the simple doughnut in order to learn more about North American culture and society Both a breakfast staple and a snack to eat any time of day or night doughnuts cross lines of gender class and race like no other food item Favorite doughnut shops that were once neighborhood institutions remain unchanged even as their surrounding neighborhoods have morphed into strip clubs empty lots and abandoned housing Blending solid scholarship with humorous insights Mullins offers a look into doughnut production marketing and consumption He confronts head on the question of why we often paint doughnuts in moral terms and shows how the seemingly simple food reveals deep and complex social conflicts over body image and class structure In Mullins s skillful hands this simple pastry provides surprisingly compelling insights into our eating habits our identity and modern consumer culture **Trade, Stability, Technology, and Equity in Latin America** Moshé Syrquin,Simón Teitel,2014-06-28 Trade Stability Technology and Equity in Latin America provides information pertinent to the substantial social and economic progress in Latin America This book covers a variety of topics including international trade technology equity external instability and stabilization and growth Organized into five parts encompassing 21 chapters this book begins with an overview of the purchasing power parity theory of exchange rate determination and the law of one price This text then provides a discussion of extending the monetary approach to the balance of payments to incorporate terms of trade effects Other chapters consider the experience with the promotion of labor intensive exports of manufacturers This book discusses as well the pros and cons of external debt in Latin American development The final chapter deals with economic development and provides an examination of basic needs income distribution and employment This book is a valuable resource for policy makers industrialists economists and structuralists *Geological Survey Water-supply Paper* ,1950 **New One-family Homes Sold and for Sale: 1963 to 1967** United States. Bureau of the Census,1967 *Ecology or Catastrophe* Janet Biehl,2015-09-01 Murray Bookchin was not only one of the most significant and influential environmental philosophers of the twentieth century he was also one of the most prescient From industrial agriculture to nuclear radiation Bookchin has been at the forefront of every major ecological issue since the very beginning often proposing a solution before most people even recognized there was a problem Ecology or Catastrophe The Life of Murray Bookchin is the first biography of this groundbreaking environmental and political thinker Author Janet Biehl worked as his collaborator and copyeditor for 19 years editing his every word Thanks to her extensive

personal history with Bookchin as well as her access to his papers and archival research Ecology or Catastrophe offers unique insight into his personal and professional life Founder of the social ecology movement Bookchin first started raising environmental issues in 1952 He foresaw global warming in the 1960s and even then argued that we should look into renewable energy sources as an alternative to fossil fuels Wary of pesticides and other chemicals used in industrial agriculture he was also an early advocate of small scale organic farming which has developed into the present locavore movement and the revival of organic markets Even Occupy can trace the origins of its leaderless structure and general assemblies to the nonhierarchical organizational form Bookchin developed as a libertarian socialist Bookchin believed that social and ecological issues were deeply intertwined Convinced that capitalism pushes businesses to maximize profits and ignore humanist concerns he argued that eco crises could be resolved by a new social arrangement His solution was Communalism a new form of libertarian socialism that he developed An optimist and utopian Bookchin believed in the potentiality for human beings to use reason to solve all social and ecological problems

Changes in Cigarette-related Disease Risks and Their Implication for Prevention and Control ,1997 This volume presents results from three large more contemporary prospective mortality studies and provides longer followup for two of the older studies dating from the 1950 s When observations from the more contemporary studies are compared with those from the 1950 s one important but disturbing conclusion is apparent mortality risks among continuing smokers both males and females have increased In fact relative risks for smokers compared to never smokers have increased for all major smoking related diseases coronary heart disease CHD lung cancer other smoking related cancers stroke and chronic obstructive pulmonary disease COPD This increase over time in the relative risks for smokers compared to never smokers has occurred despite a dramatic decline in cardiovascular disease CVD death rates in the U S population suggesting that the decline in CVD death rates has been proportionately greater among never smokers than among continuing smokers The clearest message that is drawn from the enormous quantity of data presented in this monograph is that smoking prevention and cessation efforts are complementary not alternative solutions to the current epidemic of diseases caused by smoking
