Rastogi, 2007-10-16 Introduction to Non equilibrium Physical Chemistry presents a critical and comprehensive account of Non equilibrium Physical Chemistry from theoretical and experimental angle It covers a wide spectrum of non equilibrium phenomena from steady state close to equilibrium to non linear region involving transition to bistability temporal oscillations spatio temporal oscillations and finally to far from equilibrium phenomena such as complex pattern formation dynamic instability at interfaces Chaos and complex growth phenomena fractals in Physico chemical systems Part I of the book deals with theory and experimental studies concerning transport phenomena in membranes Thermo osmosis Electroosmotic and in

continuous systems Thermal diffusion Soret effect close to equilibrium Experimental tests provide insight into the domain of validity of Non equilibrium Thermodynamics which is the major theoretical tool for this region Later developments in Extended Irreversible Thermodynamics and Non equilibrium Molecular dynamics have been discussed in the Appendix Part II deals with non linear steady states and bifurcation to multistability temporal and spatio temporal oscillations Chemical waves Similarly Part II deals with more complex phenomena such as Chaos and fractal growth occurring in very far from equilibrium region Newer mathematical techniques for investigating such phenomena along with available experimental studies Part IV deals with analogous non equilibrium phenomena occurring in the real systems Socio political Finance and Living systems etc for which physico chemical systems discussed in earlier chapters provide a useful model for development of theories based on non linear science and science of complexity The book provides a critical account of theoretical studies on non equilibrium phenomenon from region close to equilibrium to far equilibrium Experimental studies have been reported which provide test of the theories and their limitations Impacts of the concepts developed in non equilibrium Physical Chemistry in sociology economics and other social science and living systems has been discussed *Monthly Catalog of United States Government Publications* United States.
