Committee on Appropriations,1967 *Syncrisis: the Dynamics of Health* ,1972 *Essays on the Cold War* Murray Wolfson,2016-07-27 This book is concerned with the ideological origins of the cold war and how it was fought by economic means The book revolves around four major themes Firstly it is argued that the origin of the cold war is not to be found in rational economic motivation but in ideology through which both the East and West perceived reality Secondly these ideological preconceptions generated complex feed back processes of hostility that lasted forty years Thirdly although this hostility was expressed in political ideological and military terms the decisive battle was fought in economic terms as each nation devoted resources to unproductive military purposes Finally the end of the cold war came with the collapse of the dysfunctional Soviet economy Although the Soviets lost the cold war in the light of the ascendancy of its competitors the United States did not win it HUD-space-science-veterans Appropriations for 1973 United States.
