Robinson, 2021-03-01 Architecture is a Verb outlines an approach that shifts the fundamental premises of architectural design and practice in several important ways First it acknowledges the centrality of the human organism as an active participant interdependent in its environment Second it understands human action in terms of radical embodiment grounding the range of human activities traditionally attributed to mind and cognition imagining thinking remembering in the body Third it asks what a building does that is extends the performative functional interpretation of design to interrogate how buildings move and in turn move us how they shape thought and action Finally it is committed to articulating concrete situations by developing a taxonomy of human building interactions Written in engaging prose for students of architecture interiors and urban design as well as practicing professionals Sarah Robinson offers richly illustrated practical examples for a new generation of designers **Liberty Intact** Michael Tugendhat, 2016-12-06 What are the connections between

conceptions of rights found in English law and those found in bills of rights around the World How has English Common Law influenced the Universal Declaration of Human Rights UDHR 1948 and the European Convention on Human Rights ECHR 1950 These questions and more are answered in Michael Tugendhat's historical account of human rights from the eighteenth century to present day Focusing specifically on the first modern declarations of the rights of mankind the Virginian Declaration of Rights 1776 the French Declaration of the Rights of Man and of the Citizen 1789 and the United States Bill of Rights 1791 the book recognises that the human rights documented in these declarations of the eighteenth century were already enshrined in English common law many originating from English law and politics of the fifteenth century The influence of English Common Law taken largely from Blackstone's Commentaries on the Laws of England can also be realised in the British revolutions of 1642 and 1688 the American and French Revolutions of 1776 and 1789 respectively and through them on the UDHR and ECHR Moreover Tugendhat argues that British law in all but a few instances either meets or exceeds human rights standards and thus demonstrates that human rights law is British law and not a recent invention imported from abroad Structured in three sections this volume I provides a brief history of human rights II examines the rights found in the American and French declarations and demonstrates their ancestry with English law and III discusses the functions of rights and how they have been and are put to use An Analysis of the Economic and Security Aspects of the

Fluck,Vogelsang-Eastwood,2003-11-01 An extremely rare and conspicuous find of oriental riding costumes in the late antique  
necropolis of Antinoopolis Middle Egypt brought together a number of specialists piecing together their evolution and  
historical context The first part deals with the evolution and distribution of the oriental riding costume in the Middle and  
Near East through the ages and the historical background on the find spot The second part focuses on the original costumes  
in various museum collections including much so far unpublished material technical researches and reconstructions  
Surprising new insights on the social background of their owners has been obtained by carefully studying and piecing  
together the finding context Also the representations of riding costumes in and on different monuments are carefully  
examined The book is richly illustrated with colour and black and white plates      **Monthly Catalog of United States**
