NASA Technical Memorandum ,1986 *Oklahoma Agriculture* ,1971 **Sheltered Workshops** United States. Wage and Hour and Public Contracts Divisions,1969 **Permeable Border** John J. Bukowczyk, This text examines the history of the Great Lakes Basin in relation to its importance as a place of social economic and political interaction between the United States and Canada Studies on the Text and Versions of the Hebrew Bible in Honour of Robert Gordon Geoffrey Khan,Diana Lipton,2011-10-28 This collection of previously unpublished essays by outstanding international scholars in honour of Robert P Gordon Regius Professor of Hebrew at Cambridge University covers a wide range of topics from accuracy anachronism and incongruity in the books of Samuel through the theology of Psalms ancient Near eastern historiography and the ideology of the Septuagint to philology and grammar in the Dead Sea Scrolls Targum Josephus and medieval sources It should interest readers concerned with inner biblical exegesis and the Hebrew Bible in relation to its parallels translations and versions as well as with big questions about the classification of the Bible and its antecedents as books the social context of the Dead Sea Scrolls and Christian attitudes towards original Hebrew **Young Mongols and Vigilantes in Inner Mongolia's Interregnum Decades, 1911-1931** Christopher Atwood,2022-10-04 In *Young Mongols and Vigilantes in Inner Mongolia's Interregnum Decades 1911-1931* a vivid narrative of the underground world of pan Mongolist agitation in China the author shows how the paradoxical legacy of China's New Policies reforms left ethnically based nationalism as the only common denominator for political action In the turbulent years of China's warlord republic educated Mongol nationalists and rural vigilantes sought to unify Inner Mongolia with the independent state in Mongolia proper Brought together by the Soviet embassy the nationalists fought for an autonomous Inner Mongolia until their final doomed uprisings of 1928 Based on previously closed Mongolian archives *Young Mongols and Vigilantes* is a path breaking contribution to the history of Soviet involvement in Inner Mongolia Chinese Communist nationality policy and the social history of multi ethnic Inner Mongolia The print edition is available as a set of two volumes 9789004126077 Reading the World Mary Franklin-Brown,2012-09 The thirteenth century saw such a proliferation of new encyclopedic texts that more than one scholar has called it the century of the encyclopedias Various referred to as a *speculum* *thesaurus* or *imago mundi* the term *encyclopedia* was not commonly applied to such books until the eighteenth century these texts were organized in such a way that a reader could easily locate a collection of authoritative statements on any given topic Because they reproduced rather than simply summarized parts of prior texts these compilations became libraries in miniature In this groundbreaking study Mary Franklin Brown examines writings in Latin Catalan and French that are connected to the encyclopedic movement Vincent of Beauvais's *Speculum maius* Ramon Llull's *Libre de meravelles* *Arbor scientiae* and *Arbre de filosofia d amor* and Jean de Meun's continuation of the *Roman de la Rose* Franklin Brown analyzes the order of knowledge in these challenging texts describing the wide ranging interests the textual practices including commentary compilation and organization and the diverse

discourses that they absorb from preexisting classical patristic and medieval writing She also demonstrates how these encyclopedias like libraries became heterotopias of knowledge spaces where many possible ways of knowing are juxtaposed But Franklin Brown's study will not appeal only to historians she argues that a revised understanding of late medievalism makes it possible to discern a close connection between scholasticism and contemporary imaginative literature She shows how encyclopedists employed the same practices of figuration narrative and citation as poets and romancers while much of the difficulty of the imaginative writing of this period derives from a juxtaposition of heterogeneous discourses inspired by encyclopedias With rich and innovative readings of texts both familiar and neglected *Reading the World* reveals how the study of encyclopedism can illuminate both the intellectual work and the imaginative writing of the scholastic age

Christianity, Social Tolerance, and Homosexuality John Boswell, 2015-12-10 What makes this work so exciting is not simply its content but its revolutionary challenge to Western culture's most familiar moral assumptions *Newsweek* John Boswell's National Book Award winning study of the history of attitudes toward homosexuality in the early Christian West was a groundbreaking work that challenged preconceptions about the Church's past relationship to its gay members among them priests bishops and even saints when it was first published thirty five years ago The historical breadth of Boswell's research from the Greeks to Aquinas and the variety of sources consulted make this one of the most extensive treatments of any single aspect of Western social history Now in this thirty fifth anniversary edition with a new foreword by leading queer and religious studies scholar Mark D Jordan *Christianity Social Tolerance and Homosexuality* is still fiercely relevant This landmark book helped form the disciplines of gay and gender studies and it continues to illuminate the origins and operations of intolerance as a social force Truly groundbreaking work Boswell reveals unexplored phenomena with an unfailing erudition Michel Foucault *Revolutionary* sets a standard of excellence that one would have thought impossible in the treatment of an issue so large uncharted and vexed Improbably as it might seem this work of unrelenting scholarship and high intellectual drama is also thoroughly entertaining *New York Times Book Review* One day when all churches accept the presence and achievements of gay people with approbation instead of denial or disapproval Boswell will in no small way be responsible *Gay Lesbian Review*

The Economic Turn Steven Kaplan, Sophus Reinert, 2019-01-16 The mid eighteenth century witnessed what might be dubbed an economic turn that resolutely changed the trajectory of world history The discipline of economics itself emerged amidst this turn and it is frequently traced back to the work of François Quesnay and his school of Physiocracy Though lionized by the subsequent historiography of economics the theoretical postulates and policy consequences of Physiocracy were disastrous at the time resulting in a veritable subsistence trauma in France This galvanized relentless and diverse critiques of the doctrine not only in France but also throughout the European world that have hitherto been largely neglected by scholars Though Physiocracy was an integral part of the economic turn it was rapidly overcome both theoretically and practically with durable and important consequences for the history of political economy

The Economic Turn brings together some of the leading historians of that moment to fundamentally recast our understanding of the origins and diverse natures of political economy in the Enlightenment

Walking New York Stephen Miller, 2014-12-01 Walk along with New York's most celebrated writers on a tour of the city that inspired them in this evolving portrait of New York through the centuries The New York Observer ONE OF THE NEW YORK OBSERVER'S TOP 10 BOOKS FOR FALL It's no wonder that New York has always been a magnet city for writers Manhattan is one of the most walkable cities in the world But while many novelists poets and essayists have enjoyed long walks in New York their experiences varied widely Walking New York is a study of celebrated writers who walked the streets of New York and wrote about the city in fiction nonfiction and poetry Though the writers were often irritated disturbed and occasionally shocked by what they saw on their walks they were still fascinated by the city Cynthia Ozick called faithfully inconstant magnetic man made unnatural the synthetic sublime Returning to New York after an absence of two decades Henry James loathed many things about bristling New York while native New Yorker Walt Whitman both celebrated and criticized Mannahatta in his writings This idiosyncratic guidebook combines literary scholarship with urban studies to reveal how this crowded dirty noisy and sometimes ugly city gave these restless analysts plenty of fodder for their craft In Walking New York you'll see the city through the eyes of Walt Whitman Herman Melville William Dean Howells Jacob Riis Henry James Stephen Crane Theodore Dreiser James Weldon Johnson Alfred Kazin Elizabeth Hardwick Colson Whitehead and Teju Cole

God and the Goddesses Barbara Newman, 2016-01-14 Contrary to popular belief the medieval religious imagination did not restrict itself to masculine images of God but envisaged the divine in multiple forms In fact the God of medieval Christendom was the Father of only one Son but many daughters including Lady Philosophy Lady Love Dame Nature and Eternal Wisdom God and the Goddesses is a study in medieval imaginative theology examining the numerous daughters of God who appear in allegorical poems theological fictions and the visions of holy women We have tended to understand these deities as mere personifications and poetic figures but that Barbara Newman contends is a mistake These goddesses are neither pagan survivals nor versions of the Great Goddess constructed in archetypal psychology but distinctive creations of the Christian imagination As emanations of the Divine mediators between God and the cosmos embodied universals and ravishing objects of identification and desire medieval goddesses transformed and deepened Christendom's concept of God introducing religious possibilities beyond the ambit of scholastic theology and bringing them to vibrant imaginative life Building a bridge between secular and religious conceptions of allegorized female power Newman advances such questions as whether medieval writers believed in their goddesses and if so in what manner She investigates whether the personifications encountered in poetic fictions can be distinguished from those that appear in religious visions and questions how medieval writers reconcile their statements about the multiple daughters of God with orthodox devotion to the Son of God Furthermore she examines why forms of feminine God talk that strike many Christians today as subversive or heretical did

not threaten medieval churchmen Weaving together such disparate texts as the writings of Latin and vernacular poets medieval schoolmen liturgists and male and female mystics and visionaries God and the Goddesses is a direct challenge to modern theologians to reconsider the role of goddesses in the Christian tradition **The Changing Agenda** Sylvia Babus Woodby, Martha Cottam, 2019-07-11 This book provides an organized overview of the changing agenda of world politics since 1945 presenting economic and social issues where that seemed appropriate even when little action was taken about them and exploring OPEC as an example of the use of producer associations Virtue and Ethics in the Twelfth Century, 2005-08-01 This volume analyses the renewal of Western moral thought in the twelfth century This renewal was marked by a burgeoning of increasingly systematized texts a lively reception of ancient moral philosophy and a greater emphasis on the psychology of the moral agent Five contributions are devoted to monastic morality Anselm of Canterbury Bernard of Clairvaux Hugh of Folieto Hugh of Saint Victor Peter Abelard another five to proto scholastic thought John of Salisbury Peter Abelard Stephen Langton the idea of natural virtue the justification of lying three discuss moral issues in a wider social context liberality vs avarice royal justice in England the cardinal virtues and the French monarchy The two remaining contributions explore ethical traditions in Islamic and Jewish philosophy With contributions by István P. Bejczy Celine Billot Vilandreau Marcia L. Colish Jeroen Laemers John Kitchen Cary J. Nederman Richard G. Newhauser Willemien Otten Burcht Pranger Riccardo Quinto Ineke van't Spijker Arjo Vanderjagt Björn Weiler and George Wilkes **A History of Sanskrit Grammatical Literature in Tibet, Volume 2 Assimilation into Indigenous Scholarship** Pieter Cornelis Verhagen, 2021-10-01 This first systematic survey of the Tibetan non canonical literature dealing with Sanskrit grammar partly consists of translations of Indic works such as revisions of canonical versions and translations of works not contained in the canon and partly of original Tibetan works In the first chapter of the book a detailed description of these textual materials is presented sixty one titles in total which were produced during all periods of Tibetan literary history from the ninth to the twentieth centuries The second chapter discusses one specific effect of the impetus of Indic traditional grammar within Tibetan scholastics namely the influence of Indic models of linguistic description on Tibetan indigenous grammar This particular assimilation of an Indic technical discipline into Tibetan scholarship is examined in detail and it is shown that other segments of Indic Buddhism were sources of inspiration and derivation for the Tibetan grammarians as well Schrödinger Equations and Diffusion Theory Masao Nagasawa, 2012-12-13 Schrödinger Equations and Diffusion Theory addresses the question What is the Schrödinger equation in terms of diffusion processes and shows that the Schrödinger equation and diffusion equations in duality are equivalent In turn Schrödinger's conjecture of 1931 is solved The theory of diffusion processes for the Schrödinger equation tells us that we must go further into the theory of systems of infinitely many interacting quantum diffusion particles The method of relative entropy and the theory of transformations enable us to construct severely singular diffusion processes which appear to be equivalent to Schrödinger equations The theory of large

deviations and the propagation of chaos of interacting diffusion particles reveal the statistical mechanical nature of the Schrödinger equation namely quantum mechanics The text is practically self contained and requires only an elementary knowledge of probability theory at the graduate level This book is a self contained very well organized monograph recommended to researchers and graduate students in the field of probability theory functional analysis and quantum dynamics what is written in this book may be regarded as an introduction to the theory of diffusion processes and applications written with the physicists in mind Interesting topics present themselves as the chapters proceed this book is an excellent addition to the literature of mathematical sciences with a flavour different from an ordinary textbook in probability theory because of the author's great contributions in this direction Readers will certainly enjoy the topics and appreciate the profound mathematical properties of diffusion processes Mathematical Reviews

American Crucible Gary Gerstle, 2017-02-28 This sweeping history of twentieth century America follows the changing and often conflicting ideas about the fundamental nature of American society Is the United States a social melting pot as our civic creed warrants or is full citizenship somehow reserved for those who are white and of the right ancestry Gary Gerstle traces the forces of civic and racial nationalism arguing that both profoundly shaped our society After Theodore Roosevelt led his Rough Riders to victory during the Spanish American War he boasted of the diversity of his men's origins from the Kentucky backwoods to the Irish Italian and Jewish neighborhoods of northeastern cities Roosevelt's vision of a hybrid and superior American race strengthened by war would inspire the social diplomatic and economic policies of American liberals for decades And yet for all of its appeal to the civic principles of inclusion this liberal legacy was grounded in Anglo Saxon culture making it difficult in particular for Jews and Italians and especially for Asians and African Americans to gain acceptance Gerstle weaves a compelling story of events institutions and ideas that played on perceptions of ethnic racial difference from the world wars and the labor movement to the New Deal and Hollywood to the Cold War and the civil rights movement We witness the remnants of racial thinking among such liberals as FDR and LBJ we see how Italians and Jews from Frank Capra to the creators of Superman perpetuated the New Deal philosophy while suppressing their own ethnicity we feel the frustrations of African American servicemen denied the opportunity to fight for their country and the moral outrage of more recent black activists including Martin Luther King Jr Fannie Lou Hamer and Malcolm X Gerstle argues that the civil rights movement and Vietnam broke the liberal nation apart and his analysis of this upheaval leads him to assess Reagan's and Clinton's attempts to resurrect nationalism Can the United States ever live up to its civic creed For anyone who views racism as an aberration from the liberal premises of the republic this book is a must reading Containing a new chapter that reconstructs and dissects the major struggles over race and nation in an era defined by the War on Terror and by the presidency of Barack Obama *American Crucible* is a must read for anyone who views racism as an aberration from the liberal premises of the republic

their political moral and social judgments Such appeals to the moral authority of nature are still very much with us today as heated debates over genetically modified organisms and human cloning testify The Moral Authority of Nature offers a wide ranging account of how people have used nature to think about what counts as good beautiful just or valuable The eighteen essays cover a diverse array of topics including the connection of cosmic and human orders in ancient Greece medieval notions of sexual disorder early modern contexts for categorizing individuals and judging acts as against nature race and the origin of humans ecological economics and radical feminism The essays also range widely in time and place from archaic Greece to early twentieth century China medieval Europe to contemporary America Scholars from a wide variety of fields will welcome The Moral Authority of Nature which provides the first sustained historical survey of its topic Contributors Danielle Allen Joan Cadden Lorraine Daston Fa ti Fan Eckhardt Fuchs Valentin Groebner Abigail J Lustig Gregg Mitman Michelle Murphy Katharine Park Matt Price Robert N Proctor Helmut Puff Robert J Richards Londa Schiebinger Laura Slatkin Julia Adeney Thomas Fernando Vidal

Science and the Secrets of Nature William Eamon, 2020-06-30 By explaining how to sire multicolored horses produce nuts without shells and create an egg the size of a human head Giambattista Della Porta's Natural Magic 1559 conveys a fascination with tricks and illusions that makes it a work difficult for historians of science to take seriously Yet according to William Eamon it is in the how to books written by medieval alchemists magicians and artisans that modern science has its roots These compilations of recipes on everything from parlor tricks through medical remedies to wool dyeing fascinated medieval intellectuals because they promised access to esoteric secrets of nature In closely examining this rich but little known source of literature Eamon reveals that printing technology and popular culture had as great if not stronger an impact on early modern science as did the traditional academic disciplines
