Psychophysiology Paul A. Obrist,A.H. Black,Jasper Brener,Leo V. DiCara,2017-11-13 The literature relating to the learned control of autonomic processes especially cardiovascular processes demonstrating that the activities of visceral response systems may be modified by operant reinforcement and biofeedback procedures has grown exponentially This research seems to show behavioral properties in the cardiovascular system that were previously believed to be exclusive attributes of the somatic response systems the implications of this for possible therapeutic use have received widespread publicity Questions remained unanswered about the nature of voluntary control and the conditions necessary for establishing it the reciprocal effects of conditioned changes in cardiovascular and psychological or behavioral functioning the use of cardiovascular events to index behavioral states and the principles and techniques whereby operant conditioning of the cardiovascular system can be clinically applied

Reinforcement R. M. Gilbert,J. R. Millenson,2014-05-10 Reinforcement Behavioral Analyses covers the proceedings of the 1970 Symposium on Schedule induced and Schedule Dependent Phenomena held in Toronto Ontario Canada This symposium highlights theoretically inclined papers on reinforcement processes This text contains 10 chapters and begins with a description of how behavior is induced by various environmental events especially reinforcing events as well as the relationship between control by inducing stimuli and reinforceability The

subsequent chapters deal with reinforcement phenomena in terms of preference relations and the conditioned emotional responses in terms of opposing motivational processes These topics are followed by reviews of schedule dependent effects of preaversive stimuli and the maintenance of behavior by apparent reinforcers that might be expected to punish as well as the identification of critical variable that underlie the phenomenon Other chapters examine the interactions between operant and responded conditioning processes The final chapters outline the experiments on behavior stream whose hallmark is reinforcement if the absence of specified behavior These chapters emphasize the analogy between the evolution of species and the modification of behavior This book will be of value to behaviorists and psychologists **Financial Report of**
