The Litigious Athenian Matthew R. Christ,1998-11-20 The democratic revolution that swept Classical Athens transformed the role of law in Athenian society The legal process and the popular courts took on new and expanded roles in civic life Although these changes occurred with the consent of the people demos Athenians were ambivalent about the spread of legal culture In particular they were aware that unscrupulous individuals might manipulate the laws and the legal process to serve their own purposes Indeed throughout the Classical Period when Athenians gathered in public and private settings they regularly discussed debated and complained about legal chicanery or sykophantia In *The Litigious Athenian* Matthew Christ explores what this ancient discussion reveals about how Athenians conceived of and responded to problematic aspects of their collective legal experience The transfer of significant judicial power from the elite Areopagus Council to the popular courts was a crucial step in the establishment of Athenian democracy Christ notes and Athenians took great pride in their legal system They chose not to make significant changes to their legal institutions even though they could have done so at any time through a majority vote of the Assembly Determining that the term sykophant was applied rhetorically rather than as some have believed to describe a specific subclass Christ shows how the public debates over legal chicanery helped define the limits of ethical behavior under the law and in public life

postcolonial African and Caribbean literature show that tropes of confinement appear frequently in female authored texts where home is often depicted as a place of alienation this critical study examines ambiguities associated with domestic space as enclosure as it explores the relationship between the female protagonist and the inner and outer spaces of her world domestic imaginative and public space Writing from the Hearth probes the hypothesis that the female protagonist can move toward empowerment by entering public space from which she has been excluded by indigenous patriarchs and European colonizers and by establishing a new relationship to domestic space or securing a liberating alternative space within it Flexible and multipurpose alternative space is a place of possibilities that can function as a refuge for meditation recollection or fantasy an antechamber for action and a site of resistance and performance Here by telling the tale writing the creative work a woman can affirm her sense of self

The Hermeneutic Nature of Analytic Philosophy

Santiago Zabala, 2008-05-14 Contemporary philosopher analytic as well as continental tend to feel uneasy about Ernst Tugendhat who though he positions himself in the analytic field poses questions in the Heideggerian style Tugendhat was one of Martin Heidegger's last pupils and his least obedient pursuing a new and controversial critical technique Tugendhat took Heidegger's destruction of Being as presence and developed it in analytic philosophy more specifically in semantics Only formal semantics according to Tugendhat could answer the questions left open by Heidegger Yet in doing this Tugendhat discovered the latent hermeneutic nature of analytic philosophy its post metaphysical dimension in which there are no facts but only true propositions What Tugendhat seeks to answer is this What is the meaning of thought following the linguistic turn Because of the rift between analytic and continental philosophers very few studies have been written on Tugendhat and he has been omitted altogether from several histories of philosophy Now that these two schools have begun to reconcile Tugendhat has become an example of a philosopher who in the words of Richard Rorty built bridges between continents and between centuries Tugendhat is known more for his philosophical turn than for his phenomenological studies or for his position within analytic philosophy and this creates some confusion regarding his philosophical propensities Is Tugendhat analytic or continental Is he a follower of Wittgenstein or Heidegger Does he belong in the culture of analysis or in that of tradition Santiago Zabala presents Tugendhat as an example of merged horizons promoting a philosophical historiography that is concerned more with dialogue and less with classification In doing so he places us squarely within a dialogic culture of the future and proves that any such labels impoverish philosophical research

American Economic Policy and National Security Theodore H. Moran, 1993 Moran examines three economic threats that could endanger America's national security America's fundamental and cumulative decline relative to the other major industrial states a loss of crucial economic and technological capabilities within our own country and the growing dependence on other countries for vital goods services and technologies

Trade and Investment in the Middle East Rodney Wilson, 1977-06-17

Modern Critical Theory and Classical Literature J.P. Sullivan, Irene J.F. de Jong, 2018-07-17 In recent decades the study of literature in Europe and the

Americas has been profoundly influenced by modern critical theory in its various forms whether Structuralism or Deconstructionism Hermeneutics Reader Response Theory or Rezeptions sthetik Semiotics or Narratology Marxist feminist neo historical psychoanalytical or other perspectives Whilst the value and validity of such approaches to literature is still a matter of some dispute not least among classical scholars they have had a substantial impact on the study both of classical literatures and of the mentalit of Greece and Rome In an attempt to clarify issues in the debate the eleven contributors to this volume were asked to produce a representative collection of essays to illustrate the applicability of some of the new approaches to Greek and Latin authors or literary forms and problems The scope of the volume was deliberately limited to literary investigation broadly construed of Greek and Roman authors Broader areas of the history and culture of the ancient world impinge in the essays but are not their central focus The volume also contains a separate bibliography offering for the first time a complete bibliography of classical studies which incorporate modern critical theory

Elliptic Mixed, Transmission and Singular Crack Problems Gohar Harutyunyan, Bert-Wolfgang Schulze, 2007 Mixed transmission or crack problems belong to the analysis of boundary value problems on manifolds with singularities The Zaremba problem with a jump between Dirichlet and Neumann conditions along an interface on the boundary is a classical example The central theme of this book is to study mixed problems in standard Sobolev spaces as well as in weighted edge spaces where the interfaces are interpreted as edges Parametrices and regularity of solutions are obtained within a systematic calculus of boundary value problems on manifolds with conical or edge singularities This calculus allows singularities on the interface and homotopies between mixed and crack problems Additional edge conditions are computed in terms of relative index results In a detailed final chapter the intuitive ideas of the approach are illustrated and there is a discussion of future challenges A special feature of the text is the inclusion of many worked out examples which help the reader to appreciate the scope of the theory and to treat new cases of practical interest This book is addressed to mathematicians and physicists interested in models with singularities associated boundary value problems and their solvability strategies based on pseudo differential operators The material is also useful for students in higher semesters and young researchers as well as for experienced specialists working in analysis on manifolds with geometric singularities the applications of index theory and spectral theory operator algebras with symbolic structures quantisation and asymptotic analysis
