 Neoliberal Era Oliver Cowart,2021-09-30 Against the background of a growing tendency among state and local governments
 in the United States to vie against one another spending public funds and foregoing corporate tax revenues in order to
 attract private investment this book offers an analysis of local economic development and business recruitment in the
 automotive industry Asking why localities felt they could and more importantly should make deals with private capital in the
 first place this book examines the shift toward entrepreneurial local governance from a global and historically informed
 perspective Through a study of the 19 greenfield automotive assembly plants constructed in the United States during the
 neoliberal era the author draws on interviews with corporate and government elites to chart the connections between
 increasingly global competitive industry pressures and changing attitudes toward incentivizing private investment Studying
 the development of an approach that has partially reoriented local governments away from managing localities and towards
 helping manage transnational capital flows by absorbing some of the increasing risk of long term capital investment
