Hearings on H.R. 4000, the Civil Rights Act of 1990 United States. Congress. House. Committee on Education and Labor,1990 **Reports of the Boards** ,1895 The Wrong Carlos James S. Liebman,The Columbia DeLuna Project,2014-07-08 A Columbia Law School team s in depth examination of one man s 1989 wrongful conviction and execution for murder In 1989 Texas executed Carlos DeLuna a poor Hispanic man with childlike intelligence for the murder of Wanda Lopez a convenience store clerk His execution passed unnoticed for years until a team of Columbia Law School faculty and students chose to investigate his case and found that DeLuna almost certainly was innocent No one had cared enough about either the defendant or the victim to make sure the real perpetrator was found Everything that could go wrong in a criminal case did DeLuna s conviction was based on a single nighttime cross ethnic eyewitness identification with no corroborating forensic evidence At his trial DeLuna s defense that another Carlos had committed the crime was not taken seriously The lead prosecutor told the jury that the other Carlos Carlos Hernandez was a phantom of DeLuna s imagination In upholding the death penalty on appeal both the state and federal courts concluded the same thing Carlos Hernandez did not exist However he not only existed but also had a long history of violent crimes This book and its website thewrongcarlos.net reproduce law enforcement crime lab lawyer court social service media and witness records as well as court transcripts photographs radio traffic and audio and videotaped interviews documenting one of the most comprehensive investigations

Leslie Keedy, 2012-12-06 During a short visit to Bremen in December 1989 John Rosenberg had several discussions with me about computer architecture Although we had previously worked together for more than a decade in Australia we had not seen each other for over a year following my move to Bremen in 1988 Meanwhile John was spending a year on study leave at the University of St Andrews in Scotland with Professor Ron Morrison and his persistent programming research group From our conversations it was quite clear that John was having a most fruitful time in St Andrews and was gaining valuable new insights into the world of persistent programming He was very keen to explore the significance of these insights for the MONADS Project which we had been jointly directing since the early 1980s MONADS was not about persistent programming In fact it had quite different origins in the areas of software engineering and information protection In an earlier stage of the project our ideas on these themes had led us into the world of computer architecture and even hardware design in our attempts to provide an efficient base machine for our software ideas The most important practical result of this phase of the project had been the development of the MONADS PC a mini computer which would be better compared with say a V tv
