Economic Change by State and Area Income Employment and Gross Domestic Product is a special edition of Business
Statistics of the United States and a new addition to the Bernan Press library of reference titles This title presents data on
personal income employment and gross domestic product for the United States as a whole and by region state and
metropolitan statistical area MSA Data on personal income and employment extends back to 1958 for the states and regions
and to 1969 for the MSAs Patterns of Economic Change complements other Bernan Press titles such as the State and
Metropolitan Area Data Book and County and City Extra In contrast to their predominantly current and detailed cross section
data on states and metropolitan areas this book contributes historical time series measurements of key aggregates that show
how the economies of regions states and metropolitan areas have responded over time to cyclical currents and long term
trends Statistics at the state level provide a framework for analyzing current economic conditions in each state and can serve
as a basis for decision making For example Federal government agencies use the statistics as a basis for allocating funds and
determining matching grants to states The statistics are also used in forecasting models to project energy and water use
State governments use the statistics to project tax revenues and the need for public services Academic regional economists
use the statistics for applied research Businesses trade associations and labor organizations use the statistics for market
research The second edition includes information on 381 MSAs more than in the previous edition and new figures on income
and poverty Dr. A.L. Crelle's Calculating Tables August Leopold Crelle,1906 **Calculating Tables** August Leopold
