Stuart, 2022-01-14 The English historian Christopher Dawson 1889 1970 was the first Catholic Studies professor at Harvard University and has been described as one of the foremost Catholic thinkers of modern times Joseph T Stuart argues that through Dawson s study of world cultures he acquired a cultural mind by which he attempted to integrate knowledge according to four implicit rules intellectual architecture boundary thinking intellectual asceticism and intellectual bridges Dawson responded to the cultural fragmentation after the Great War 1914 1918 through this multilayered approach to culture which was an instantiation of John Henry Newman s philosophical habit of mind Stuart demonstrates how Dawson formed his cultural mind practicing an interdisciplinary science of culture involving anthropology sociology history and comparative religion and applied his cultural thinking to problems in politics and education Reimagining Jerusalem's Architectural Identities in the Later Middle Ages Cathleen A. Fleck, 2022-10-10 How can medieval art explain Jerusalem s centrality in the world faiths of Christianity and Islam This book delves into that topic by examining how Jerusalem was creatively represented and reimagined in several intriguing Christian and Islamic artworks in the later Middle Ages c 1187 to 1356 The book considers how European Catholic

crusaders Eastern Christian sects and diverse Muslim factions displayed Jerusalem's architecture to express their interpretation of the holy city's sanctity and influence. These examples demonstrate how artworks can reflect Jerusalem's importance to these faiths in the past and illuminate our understanding of its status into the modern era. **Hatch v. Widdersheim, 2023-05-22 What is the public sphere how is it best described and what role does it play in modern life. These questions have attracted considerable attention within library and information science circles over several decades especially regarding public libraries. *Circulation of Power* contributes to this discussion by proposing a new research framework and new methods for analyzing public sphere communication. Using extensive data gathered from an urban public library infrastructure this historical case study demonstrates how public sphere communication shaped the infrastructure's development over time producing both changes and continuities across the case's nine periods. Two new conceptual tools circuits and decisions cycles form the study's research framework and a new explanatory theory RLCr or Releaser theory accounts for why the infrastructure developed as it did. Consideration of competing theories reveals that public sphere communication remains the best explanation for infrastructural development. This book's meticulous historical narrative of the greater Pittsburgh case supplemented by its groundbreaking theory and innovative mixed methods design is of interest to practitioners academics and general readers alike.
