Johnston,2020-08-13 Modern histories of medieval culture often assert without qualification that the oral exercise of public eloquence during the European Middle Ages was limited to preaching by the clergy The classical art of rhetoric supposedly survived only as a written subject for study in the schools During the past thirty years however knowledge of medieval rhetorical theory and practice has grown tremendously Historians and philologists have devoted particular attention to the relationship between oral and written communication in medieval Europe Their investigations are beginning to suggest not surprisingly that interest in eloquence was not confined to the schools or clergy Secular officials arguing in princely courts or town halls and laypeople seeking to develop their learning or piety also cultivated an interest in rhetoric Given the paucity of testimony available the New Rhetoric of the Mallorcan lay theologian and philosopher Ramon Llull 1232 1316 offers an exceptional witness to the non academic and non clerical concern for eloquence His proposals for new Christian arts of communication are among the best evidence available for assessing the diffusion of rhetorical doctrines from the cloisters and schools into the courts town halls and private chapels of Western Europe around 1300 Growing interest in Llull s work and in medieval rhetoric have combined to produce this first published edition The first part on order shows how Llull s entire program attempts to correlate ethical metaphysical and linguistic categories into a single system of Anselmian rightness The next section on beauty could almost form a complete art of preaching in itself thanks to the brief compilations of sermon material that it includes The broad range of discursive elements and techniques in which Llull seeks verbal beauty makes this section very eclectic in scope Part three on knowledge attempts to explain the diffusion of right linguistic and rhetorical doctrine almost exclusively through the Divine Dignities and other categories of the Great Art The final section on love consists of ten proverbs regarding loving speech each explicated with an appropriate exemplum **The Technological Value of the Sugar Beet** Sam Stuart,2013-10-22 The Technological Value of the Sugar Beet focuses on the physical properties of the beet with respect to storage slicing diffusion and filtration rate as well as the chemical composition of the juice which determines the ash lime salts nitrogenous constituents and other nonsugars in factory process liquors The selection first offers information on the characteristics of the technological value of the sugar beet including morphological characters chemical characteristics effects of chemical beet characteristics on the characteristics of the thick juice and multiple correlations The text then ponders on nonsugars in factory juices with special reference to effective alkalinity and methods for the assessment of beet quality Discussions focus on purity determination amide nitrogen amino acids betaine cations estimation of citric acid and sampling and analysis The publication is a dependable source of data for readers interested in the technological value of the sugar beet
