Africa Catherine Coquery-Vidrovitch, 1988 Coquery Vidrovitch's book is not merely good it's marvellous. It represents the finest product of the Annales tradition of structural history. Immanuel Wallerstein *Notice to Mariners*, 1970 **East Bay Municipal Utility District, Supplemental Water Supply Project**, 1997 **Chicano Authors** Bruce-Novoa, 2014-04-21

The need for this book became apparent to Bruce Novoa when he first taught a Chicano culture course in 1970. His students could find no source to satisfy their curiosity about Chicano writers' backgrounds, opinions, and attitudes. *Chicano Authors: Inquiry by Interview* provides that information. Fourteen leading Chicano authors respond to questions about their personal and educational backgrounds, their perception of the role of the Chicano writer, and their evaluation of the literary, linguistic, and sociocultural significance of Chicano literature. The authors included are Jos Antonio Villarreal, Rolando Hinojosa, Sergio Elizondo, Miguel M. Ndez, M. Abelardo Delgado, Jos Montoya, Tom's Rivera, Estela Portillo, Rudolfo A. Anaya, Bernice Zamora, Ricardo Sanchez, Ron Arias, Tino Villanueva, and Alurista. Each interview is preceded by a brief introductory note which locates the author in the context of Chicano literature and provides a sense of his or her writing. Also included are a general introduction to Chicano literature, a chronological chart of publications by genre, and a selected bibliography. The volume will be an essential research tool for the student of Chicano literature and culture and a useful introduction for the general reader.

Anatomy of Rebellion Claude Emerson Welch, 1980-01-01. *Anatomy of Rebellion* provides an understanding of four rebellions that will make clear the factors that are crucial in the development of other rebellions. Seeking a political pattern in the process of rebellion, Claude Welch Jr. has investigated four large-scale rural uprisings that came close to becoming revolutions: the Taiping rebellion in China, 1850-64; the Telengana uprising in India, 1946-51; the Mau Mau rebellion in Kenya, 1952-56; the Kwilu uprising in Zaire, 1963-65. Weaving the facts of these rebellions with theories about political violence, Welch follows the rebellions through the initial stages of discontent to the explosion of violence to the suppression of the uprisings. He then challenges explanations of political violence, both Marxist and non-Marxist, that other scholars have proposed. Rebellions have not been studied as thoroughly as the major successful revolutions, although the frequency of rebellions in the modern world is not likely to diminish. Rural dwellers' discontents are still clashing with central governments' ambitions. *Anatomy of Rebellion* clarifies how this volatile type of political violence occurs. **Chicano Poetry** Juan Bruce-Novoa, 2014-02-19. Alurista, Gary Soto, Bernice Zamora, Jos Montoya. These names luminous to some remain unknown to those who have not yet discovered the rich variety of late twentieth-century Chicano poetry. With the flowering of the Chicano Movement in the mid-1960s came not only increased political awareness for many Mexican Americans but also a body of fine creative writing. Now the major voices of Chicano literature have begun to reach the wider audience they deserve. Bruce Novoa's *Chicano Poetry: A Response to Chaos*, the first book-length critical study of Chicano poetry, examines the most significant works of a body of literature that has grown dramatically in size and importance in less than two decades. Here

are insightful new readings of the major writings of Abelardo Delgado Sergio Elizondo Rodolfo Gonzales Miguel M ndez J L Navarro Ra l Salinas Ricardo S nchez and Tino Villanueva as well as Alurista Soto Zamora and Montoya Close textual analyses of such important works as I Am Joaquin Restless Serpents and Floricanto en Aztl n enrich and deepen our understanding of their imagery themes structure and meaning Bruce Novoa argues that Chicano poetry responds to the threat of loss whether of hero barrio family or tradition Thus Jos Montoya elegizes a dead Pachuco in El Louie and Ra l Salinas laments the disappearance of a barrio in A Trip through the Mind Jail But this elegy at the heart of Chicano poetry is both lament and celebration for it expresses the group s continuing vitality and strength Common to twentieth century poetry is the preoccupation with time death and alienation and the work of Chicano poets sometimes seen as outside the traditions of world literature shares these concerns Bruce Novoa brilliantly defines both the unique and the universal in Chicano poetry

The Bet Paul Sabin,2013-09-03 The Bet uses a legendary wager between the Stanford biologist Paul Ehrlich and the conservative University of Illinois economist Julian Simon to examine the roots of modern environmentalism and its relationship to broader political conflicts in the nation Ehrlich author of the landmark 1968 book The Population Bomb believed that rising populations would cause overconsumption scarcity and disastrous famines Simon countered that flexible markets technological change and human ingenuity would allow societies to adapt to changing circumstances and continue to improve human welfare In 1980 they made a much ballyhooed bet about the future prices of five metals that served as a proxy for their arguments about the future The Bet weaves intellectual biographies of Ehrlich and Simon into the history of late twentieth century environmental politics and other struggles of the era between liberals and conservatives Humanity s larger gamble on the future still remains unresolved By wrestling with the different sides of these arguments The Bet encourages a more nuanced approach to environmental problems one that acknowledges the limitations of both ecology and economics in guiding policy and that instead emphasizes the conflicting values that underlie political choices The Bet is structured around three bets first the 1000 bet that Ehrlich and two colleagues made with Simon over the prices of chromium copper nickel tin and tungsten second the bet that the United States faced in the 1980 presidential election in choosing between Carter and Reagan and third the larger gamble that we as a society continue to make as we make choices

The Future of Just War Caron E. Gentry,Amy E. Eckert,2014-01-15 Just War scholarship has adapted to contemporary crises and situations But its adaptation has spurned debate and conversation a

method and means of pushing its thinking forward Now the Just War tradition risks becoming marginalized This concern may seem out of place as Just War literature is proliferating yet this literature remains welded to traditional conceptualizations of Just War Caron E Gentry and Amy E Eckert argue that the tradition needs to be updated to deal with substate actors within the realm of legitimate authority private military companies and the questionable moral difference between the use of conventional and nuclear weapons Additionally as recent policy makers and scholars have tried to make the Just War criteria legalistic they have weakened the tradition's ability to draw from and adjust to its contemporaneous setting The essays in *The Future of Just War* seek to reorient the tradition around its core concerns of preventing the unjust use of force by states and limiting the harm inflicted on vulnerable populations such as civilian noncombatants The pursuit of these challenges involves both a reclaiming of traditional Just War principles from those who would push it toward greater permissiveness with respect to war as well as the application of Just War principles to emerging issues such as the growing use of robotics in war or the privatization of force These essays share a commitment to the idea that the tradition is more about a rigorous application of Just War principles than the satisfaction of a checklist of criteria to be met before waging just war in the service of national interest

Nationalism and Youth in Theatre and Performance Victoria Pettersen Lantz, Angela Sweigart-Gallagher, 2014-07-11 *Nationalism and Youth in Theatre and Performance* explores how children and young people fit into national political theatre and moreover how youth enact interrogative patriotic and or antagonistic performances as they develop their own relationship with nationhood Children are often seen as excluded from public discourse or political action However this idea of exclusion is false both because adults place children at the center of political debates with the rhetoric of future generations and because children actively insert themselves into public discourse Whether performing a national anthem for visiting heads of state creating a school play about a country's birth or marching in protest of a change in public policy young people use theatre and performance as a means of publicly staking a claim in national politics directly engaging with ideas of nationalism around the world This collection explores the issues of how children fit into national discourse on international stages The authors focus on national performances by for with youth and examine a wide range of performances from across the globe from parades and protests to devised and traditional theatre *Nationalism and Youth in Theatre and Performance* rethinks how national performance is defined and offers previously unexplored historical and theoretical discussions of political youth performance

Class Field Theory Georges Gras, 2013-11-11 Global class field theory is a major achievement of algebraic number theory based on the functorial properties of the reciprocity map and the existence theorem This book explores the consequences and the practical use of these results in detailed studies and illustrations of classical subjects In the corrected second printing 2005 the author improves many details all through the book

reexamine and reevaluate their gender and cultural identity through poetic language The term Chicana refers here to women of Mexican heritage who live and write in the United States The works of four contemporary Chicana poets Alma Villanueva Lorna Dee Cervantes Lucha Corpi and Bernice Zamora are the focus of this volume This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1986 In this first book length study of the works of Chicano women writers Marta Ester Sanchez introduces the reader to a group of Chicanas who in the 1970s began to reexamine and reevaluate their gender and cultural identity through poetic language The term

Fundamentalism and Evangelicalism Martin E. Marty, 2011-06-15 No detailed description available for Fundamentalism and Evangelicalism *Early Visions and Representations of America* M. Carmen Gomez-Galisteo, 2012-11-22 When the Europeans first arrived in America they had a number of preconceptions prejudices expectations and hopes about what life in the New World would be like This book examines the different visions and representations of America conveyed in the writings of Spanish conquistador Ivar N ez Cabeza de Vaca and the Pilgrim leader William Bradford taking both writers within their respective literary and historical contexts Anthologies of American literature have consistently ignored Spanish language achievements on the grounds of a restrictive interpretation of American literature based on linguistic boundaries Consequently Spanish language texts such as Cabeza de Vaca's or the account by the Hidalgo de Elvas to name but two examples have been marginalized in the narrative of American literary history In seeking to redress this neglect Galisteo contributes to scholarship which seeks to analyze Early America as a whole including not only Anglo American perspectives but also the Spanish American aspect of the colonization process *Flows of Reactive Fluids* Roger Prud'homme, 2010-07-15 The modeling of reactive flows has progressed mainly with advances in aerospace which gave birth to a new science called aerothermochemistry as well as through developments in chemical and process engineering This work examines basic concepts and methods necessary to study reactive flows and transfer phenomena in areas such as fluid mechanics thermodynamics and chemistry The book presents tools of interest to graduate students researchers in mathematical physics and engineers who wish to investigate problems of reactive flows Portions of the text may be used in courses on the physics of liquids or in seminars on mechanics Policy Sectors in Comparative Policy Analysis Studies Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-09 Volume Four of the Classics of Comparative Policy Analysis Policy Sectors in Comparative Policy Analysis Studies contains chapters concerned with comparison within disciplinary policy sectors The volume contains detailed analyses of policies within six major policy sectors and illustrates the important differences that exist across policies healthcare environment education social welfare immigration and science and technology The reader will find some common aspects and dimensions theoretical or methodological across all policy domains as well as differences

dictated by the characteristics of the discipline or the locus in which the policy point at issue takes place. Indeed, some scholars have argued that the differences and similarities that exist across and within policy sectors can transcend the differences or similarities across political systems. Policy Sectors in Comparative Policy Analysis Studies will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be reliably contextualized, learned, facilitated or avoided through lesson drawing. The chapters were originally published as articles in the Journal of Comparative Policy Analysis, which in the last two decades has pioneered the development of comparative public policy. The volume is part of a four-volume series, the Classics of Comparative Policy Analysis, including Theories and Methods, Institutions and Governance, Regional Comparisons, and Policy Sectors. Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy: political science, public administration, governance, and policy design, authored by the JCPA co-editors Giliberto Capano, Michael Howlett, Leslie A. Pal, and B. Guy Peters.

Infections, Chronic Disease, and the Epidemiological Transition Alex Mercer, 2014. In 1949, the U.S. National Cancer Institute (NCI) and the Canadian Department of National Health and Welfare (DNHW) commissioned a film eventually called *Challenge: Science Against Cancer* as part of a major effort to recruit young scientists into cancer research. Both organizations feared that poor recruitment would stifle the development of the field at a time when funding for research was growing dramatically. The fear was that there would not be enough new young scientists to meet the demand, and that

the shortfall would undermine cancer research and the hopes invested in it Challenge aimed to persuade young scientists to think of cancer research as a career This book is the story of that forgotten film and what it tells us about mid twentieth century American and Canadian cancer research educational filmmaking and health education campaigns It explores why Canadian and American health agencies turned to film to address the problem of scientist recruitment how filmmakers turned such recruitment concerns into something they thought would work as a film and how information officers at the NCI and DNHW sought to shape the impact of Challenge by embedding it in a broader educational and propaganda program It is in short an account of the important but hitherto undocumented roles of filmmakers and information officers in the promotion of post Second World War cancer research
