Zuckerman, 2011-06-01 No detailed description available for Basic Organometallic Chemistry Monsters, Gender and Sexuality in Medieval English Literature Dana Oswald, 2010 A gendered reading of monster and the monstrous body in medieval literature Monsters abound in Old and Middle English literature from Grendel and his mother in Beowulf to those found in medieval romances such as Sir Gowther Through a close examination of the way in which their bodies are sexed and gendered and drawing from postmodern theories of gender identity and subjectivity this

book interrogates medieval notions of the body and the boundaries of human identity Case studies of Wonders of the East Beowulf Mandeville's Travels the Alliterative Morte Arthure and Sir Gowther reveal a shift in attitudes toward the gendered and sexed body and thus toward identity between the two periods while Old English authors and artists respond to the threat of the gendered monstrous form by erasing it Middle English writers allow transgressive and monstrous bodies to transform and therefore integrate into society This metamorphosis enables redemption for some monsters while other monstrous bodies become dangerously flexible and invisible threatening the communities they infiltrate These changing cultural reactions to monstrous bodies demonstrate the precarious relationship between body and identity in medieval literature

Muzhik and Muscovite Joseph Bradley,2024-03-29 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 Bureaucrats, Planters, and Workers Susan Deans-Smith,2010-07-05 Honorable Mention Bolton Memorial Prize Conference on Latin American History A government monopoly provides an excellent case study of state society relationships This is especially true of the tobacco monopoly in colonial Mexico whose revenues in the later half of the eighteenth century were second only to the silver tithe as the most valuable source of government income This comprehensive study of the tobacco monopoly illuminates many of the most important themes of eighteenth century Mexican social and economic history from issues of economic growth and the supply of agricultural credit to rural relations labor markets urban protest and urban workers class formation work discipline and late colonial political culture Drawing on exhaustive research of previously unused archival sources Susan Deans Smith examines a wide range of new questions Who were the bureaucrats who managed this colonial state enterprise and what policies did they adopt to develop it How profitable were the tobacco manufactories and how rational was their organization What impact did the reorganization of the tobacco trade have upon those people it affected most the tobacco planters and tobacco workers This research uncovers much that was not previously known about the Bourbon government's management of the tobacco monopoly and the problems and limitations it faced Deans Smith finds that there was as much continuity as change after the monopoly's establishment and that the popular response was characterized by

accommodation as well as defiance and resistance She argues that the problems experienced by the monopoly at the beginning of the nineteenth century did not originate from any simmering entrenched opposition Rather an emphasis upon political stability and short term profits prevented any innovative reforms that might have improved the monopoly s long term performance and productivity With detailed quantitative data and rare material on the urban working poor of colonial Mexico Bureaucrats Planters and Workers will be important reading for all students of social economic and labor history especially of Mexico and Latin America Recovering Classic Evangelicalism Gregory Alan Thornbury,2013-03-31 Once upon a time evangelicalism was a countercultural upstart movement Positioned in between mainline denominational liberalism and reactionary fundamentalism evangelicals saw themselves as evangelists to all of culture Billy Graham was reaching the masses with his Crusades Francis Schaeffer was reaching artists and university students at L Abri Larry Norman was recording Jesus music on secular record labels and touring with Janis Joplin and the Doors and Carl F H Henry was reaching the intellectuals through Christianity Today It was the dawn of classic evangelicalism Surveying the current evangelical landscape however one gets the feeling that we re backpedaling quickly We are more theologically diffuse culturally gun shy and fragmented than ever before What has happened And how do we find our way back Using the life and work of Carl F H Henry as a key to evangelicalism s past and a cipher for its future this book provides crucial insights for a renewed vision of the church s place in modern society and charts a refreshing course toward unity under the banner of classic evangelicalism

Bibliography of Semiotics, 1975-1985 ,1986-01-01 This bibliography of semiotic studies covering the years 1975 1985 impressively reveals the world wide intensification in the field During this decade national semiotic societies have been founded allover the world a great number of international national and local semiotic conferences have taken place the number of periodicals and book series devoted to semiotics has increased as has the number of books and dissertations in the field This bibliography is the result of a dedicated effort to approach complete coverage Applications of Learning Classifier Systems Larry Bull,2012-08-13 The field called Learning Classifier Systems is populated with romantics Why shouldn t it be possible for computer programs to adapt learn and develop while interacting with their environments In particular why not systems that like organic populations contain competing perhaps cooperating entities evolving together John Holland was one of the earliest scientists with this vision at a time when so called artificial intelligence was in its infancy and mainly concerned with preprogrammed systems that didn t learn that like organisms had sensors took Instead Holland envisaged systems actions and had rich self generated internal structure and processing In so doing he foresaw and his work prefigured such present day domains as reinforcement learning and embedded agents that are now displacing the

older standard. At one focus was what Holland called classifier systems: sets of competing rule-like classifiers, each a hypothesis as to how best to react to some aspect of the environment or to another rule. The system embracing such a rule population would explore its available actions and responses, rewarding and rating the active rules accordingly. Then good classifiers would be selected and reproduced, mutated, and even crossed, à la Darwin and genetics, steadily and reliably increasing the system's ability to cope.

Sequences, Summability and Fourier Analysis S. Nanda, 2005 *Sequences, Summability and Fourier Analysis* deals with various aspects of summability, a major branch of analysis. The subject grew extensively during the twentieth century through the contribution of eminent analysts, but there are numerous unsolved problems which still baffle the present-day scholars, as the application side has been poorly attended to. This volume contains original research articles, many valuable survey articles on approximation theory, multivalent functions, almost convergence, and absolute almost convergence, Tauberian theorems, the Toeplitz duals of sequence spaces, random Fourier series, stochastic integrals, interpolative subspaces of Banach space, metric transformations in sequence spaces, absolute summability, and Nrlund summability.

The Study of Evangelism Paul W. Chilcote, Lacey C. Warner, 2008-02-13 Christians and communities of faith today are rediscovering evangelism as an essential aspect of the church's mission. Many of the resulting books in the marketplace, however, have a hands-on orientation, often lacking serious theological engagement and reflection. Bucking that trend, *The Study of Evangelism* offers thirty groundbreaking essays that plumb the depths of the biblical and theological heritage of the church with reference to evangelistic practice. Helpfully organized into six categories, these broad, diverse writings lay a solid scholarly foundation for meaningful dialogue about the church's practice of evangelism.
