**Auto** ,1954 *Mechanotransduction in Vascular Development and Disease* Julia J. Mack,Brian Gene Coon,Nicolas Baeyens,2024-12-26 There is growing interest in understanding the dynamic roles of physical forces in vascular development homeostasis and disease While it is well established that all cells are responsive to their external environment and the cells of the vascular system are constantly exposed to hemodynamic forces we are still uncovering how these external cues influence vascular cell signaling to direct cell identity cell phenotype vascular organization and vessel function Work is emerging that defines how vascular cells interpret and respond to these external forces to reveal how the biomechanical environment influences cell signaling and behavior This collection on vascular mechanotransduction will address how cells respond to external physical forces during vessel development and organization later in vessel homeostasis and in the context of cardiovascular disease *Foreign Commerce and Navigation of the United States* United States.
