The Political Economy of Hungarian Authoritarian Populism Samuel Rogers,2024-08-30 This book emphasises the importance of state business relations and external capital for structuring and strengthening authoritarian populism in Hungary It argues these capitalist relations are crucial to understanding the economic aspects of this ideology which has developed in the country since 2010 The book investigates both internal and external legs of the Hungarian political economy First how a politically loyal national capital owning class has subsumed domestic business Second the government s operationalisation of new inward transnational capital inflows especially from China and Russia to finance large scale infrastructure projects which complement extant investment particularly from Germany Together these developments have strengthened the hegemonic nature of Hungarian Authoritarian Populism helping the government to continued electoral success This model of governance is attractive to similar ideological expressions in the region and beyond who look for an example to emulate The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *Stocks of Grains in All*

Economic Rise Congressional Research Service,2017-09-17 Prior to the initiation of economic reforms and trade liberalization 36 years ago China maintained policies that kept the economy very poor stagnant centrally controlled vastly inefficient and relatively isolated from the global economy Since opening up to foreign trade and investment and implementing free market reforms in 1979 China has been among the world s fastest growing economies with real annual gross domestic product GDP growth averaging nearly 10% through 2016 In recent years China has emerged as a major global economic power It is now the world s largest economy on a purchasing power parity basis manufacturer merchandise trader and holder of foreign exchange reserves The global economic crisis that began in 2008 greatly affected China s economy China s exports imports and foreign direct investment FDI inflows declined GDP growth slowed and millions of Chinese workers reportedly lost their jobs The Chinese government responded by implementing a 586 billion economic stimulus package and loosening monetary policies to increase bank lending Such policies enabled China to effectively weather the effects of the sharp global fall in demand for Chinese products but may have contributed to overcapacity in several industries and increased debt by Chinese firms and local government China s economy has slowed in recent years

Real GDP growth has slowed in each of the past six years dropping from 10.6% in 2010 to 6.7% in 2016 and is projected to slow to 5.7% by 2022. The Chinese government has attempted to steer the economy to a new normal of slower but more stable and sustainable economic growth. Yet concerns have deepened in recent years over the health of the Chinese economy. On August 11, 2015, the Chinese government announced that the daily reference rate of the renminbi (RMB) would become more market oriented. Over the next three days, the RMB depreciated against the dollar and led to charges that China's goal was to boost exports to help stimulate the economy, which some suspect is in worse shape than indicated by official Chinese economic statistics. Concerns over the state of the Chinese economy appear to have often contributed to volatility in global stock indexes in recent years. The ability of China to maintain a rapidly growing economy in the long run will likely depend largely on the ability of the Chinese government to implement comprehensive economic reforms that more quickly hasten China's transition to a free market economy, rebalance the Chinese economy by making consumer demand rather than exporting and fixed investment the main engine of economic growth, boost productivity and innovation, address growing income disparities, and enhance environmental protection. The Chinese government has acknowledged that its current economic growth model needs to be altered and has announced several initiatives to address various economic challenges. In November 2013, the Communist Party of China held the Third Plenum of its 18th Party Congress, which outlined a number of broad policy reforms to boost competition and economic efficiency. For example, the communique stated that the market would now play a decisive role in allocating resources in the economy. At the same time, however, the communique emphasized the continued important role of the state sector in China's economy. In addition, many foreign firms have complained that the business climate in China has worsened in recent years. Thus, it remains unclear how committed the Chinese government is to implementing new comprehensive economic reforms. China's economic rise has significant implications for the United States and hence is of major interest to Congress. This report provides background on China's economic rise, describes its current economic structure, identifies the challenges China faces to maintain economic growth, and discusses the challenges, opportunities, and implications of China's economic rise. [Malaysia Annual Statistics of External Trade](#), 1978. *China Returns to Africa* Chris Alden, 2008. The geopolitical landscape of contemporary China-Africa relations has provoked wide media interest. After being conspicuously overlooked during the G8's purported Year of Africa, the topic generated wider debate in the build up to the China-Africa Summit in Beijing in 2006. Despite this, China's deepening re-engagement with the African continent has been relatively neglected in academic and development policy circles. In particular, the concrete ways in which different Chinese actors are operating in different parts of Africa, their political dynamics, and implications for African development, as well as Western views of this phenomenon, have yet to be explored in depth. *China Returns to Africa* responds to this need by addressing the key issues in contemporary China-Africa relations. Taking its cue from the widely touted Chinese Scramble for Africa and the accompanying claim of a new Chinese

imperialism the book moves beyond narrow media driven concerns to offer one of the first far ranging surveys of China s return to Africa examining what this new relationship holds for diplomacy trade and development **Thieves of State** Sarah Chayes,2016-03-22 A former adviser to the Joint Chiefs of Staff explains how government s oldest problem is its greatest destabilizing force The world is blowing up Every day a new blaze seems to ignite the bloody implosion of Iraq and Syria the East West standoff in Ukraine abducted schoolgirls in northern Nigeria Is there some thread tying these frightening international security crises together In a riveting account that weaves history with fast moving reportage and insider accounts from the Afghanistan war Sarah Chayes identifies the unexpected link corruption Since the late 1990s corruption has reached such an extent that some governments resemble glorified criminal gangs bent solely on their own enrichment These kleptocrats drive indignant populations to extremes ranging from revolution to militant puritanical religion Chayes plunges readers into some of the most venal environments on earth and examines what emerges Afghans returning to the Taliban Egyptians overthrowing the Mubarak government but also redesigning Al Qaeda and Nigerians embracing both radical evangelical Christianity and the Islamist terror group Boko Haram In many such places rigid moral codes are put forth as an antidote to the collapse of public integrity The pattern moreover pervades history Through deep archival research Chayes reveals that canonical political thinkers such as John Locke and Machiavelli as well as the great medieval Islamic statesman Nizam al Mulk all named corruption as a threat to the realm In a thrilling argument connecting the Protestant Reformation to the Arab Spring *Thieves of State* presents a powerful new way to understand global extremism And it makes a compelling case that we must confront corruption for it is a cause not a result of global instability *Die europäische Patentanmeldung in Frage und Antwort* Günter Gall,1982

The Economics of the Belt and Road Initiative World Bank,2019-06-15 China proposed the Belt and Road Initiative in 2013 to improve connectivity and cooperation on a transcontinental scale This study by a team of World Bank Group economists led by Michele Ruta analyzes the economics of the initiative It assesses the connectivity gaps between economies along the initiative s corridors examines the costs and economic effects of the infrastructure improvements proposed under the initiative and identifies complementary policy reforms and institutions that will support welfare maximization and mitigation of risks for participating economies

"You'll be Fired If You Refuse" Matt Wells,2011 The past decade has seen burgeoning investment across Africa by private and state run Chinese enterprises This report examines the labor practices of a Chinese state owned enterprise in four copper mining operations in Zambia While Zambia s copper miners welcome Chinese run companies substantial investment and job creation they also encounter abusive employment conditions that violate national and international standards and fall short of practices among the other multinationals operating in Zambia s copper mining industry Miners at Chinese run companies described consistently poor health and safety standards including inadequate ventilation that can lead to serious lung diseases hours of work in excess of Zambian law the failure to replace workers damaged protective

equipment and routine threats of being fired should they refuse to work in unsafe places. These practices combined with the already dangerous nature of the work cause injuries and other health complications. Many of the labor practices in Zambia seem to be exported from China's domestic mining industry with safety and health measures treated as irritating barriers to greater profits rather than as good business practices both in the Chinese domestic mining industry and in Chinese run mines in Zambia. Primary responsibility for ensuring that Zambia's copper mines operate in accordance with national and international standards rests with the Zambian government which has largely failed to enforce the country's labor laws and mining regulations. A September 20 2011 presidential election brought to power longtime opposition politician Michael Sata who has long been critical of labor practices in Chinese run companies. Sata should now demonstrate that his rhetoric will be matched by action to protect workers' rights.
