Cultural Politics of the Creative Industries Phil Graham, 2024-10-11 This book presents the creative industries as a suite of practices intimately connected to political economic and cultural power Seeking to illuminate the creative industries through critical cultural analysis it shows the extent to which creative labour shapes our shared cultural and political realities good and bad The author presents creative labour as a form of employment which typically operates well outside conventional industrial relationships highlighting the importance of cultural as well as political and economic value The aim of doing so is to provide a view of the broader creative economy that shows up the effects and trends of its strange industrial relationships It recognises new forms of audience labour as significant creative political cultural and commercial forces and frames cultures as preceptual systems as systems of rules conventions mores and laws In so doing the author provides a new cultural framework through which scholars students and reflective practitioners can make critical judgements about the creative economy and its creative acts
