Processing and Statistical Classification George J. Miao, Mark A. Clements, 2002 This is the first book to introduce and integrate advanced digital signal processing DSP and classification together and the only volume to introduce state of the art transforms including DFT FFT DCT DHT PCT CDT and ODT together for DSP and communication applications You get step by step guidance in discrete time domain signal processing and frequency domain signal analysis digital filter design and adaptive filtering multirate digital processing and statistical signal classification It also helps you overcome problems associated with multirate A D and D A converters *Astrographic Catalogue 1900.0: Catalogo astrofotografico de Observatorio Astronomico de Tacubaya, Mexico. 7 v*, 1944 *Hilbert Transforms in Signal Processing* Stefan L. Hahn, 1996 This book presents a first ever detailed analysis of the complex notation of 2 D and 3 D signals and describes how you can apply it to image processing modulation and other fields It helps you significantly reduce your literature research time better enables you to simulate signals and communication systems and helps you to design compatible single sideband systems

Signal Processing Fundamentals and Applications for Communications and Sensing Systems John Minkoff, 2002 This cutting edge book is a clear and thorough exposition of signal processing fundamentals for communications and major sensing systems Based on the author's earlier book in this area this revised and expanded resource offers you expert guidance in the detection of optical acoustic and radio frequency signals in noise It covers digital filtering and parameter estimation and helps you with problems associated with radar system design including search tracking and measurement ambiguity **Statistical Signal Characterization** Herbert L. Hirsch, 1992 This book defines quantifies and characterizes statistical signal characterization SSC a powerful technique for signal analysis association and discrimination that offers simpler alternatives to Fourier methods for certain applications *Computer Speech Technology* Robert Rodman, 1999 This new book is the first to provide a truly understandable non technical overview of all the major areas in the computer processing of human speech speech recognition speech synthesis speaker recognition language identification lip

synchronization and co channel separation It takes a unique nonmathematical approach in exploring the nature of human language and its impact on the science and methodologies of computer voice technology In one easy to read source you gain a deeper understanding of the fundamentals uses and applications of the technology itself and of the strengths and weaknesses of various systems A time saving glossary of technical terms is included

Digital Signal Processing Using MATLAB Vinay K. Ingle, John G. Proakis, 2007 This supplement to any standard DSP text is one of the first books to successfully integrate the use of MATLAB in the study of DSP concepts In this book MATLAB is used as a computing tool to explore traditional DSP topics and solve problems to gain insight This greatly expands the range and complexity of problems that students can effectively study in the course Since DSP applications are primarily algorithms implemented on a DSP processor or software a fair amount of programming is required Using interactive software such as MATLAB makes it possible to place more emphasis on learning new and difficult concepts than on programming algorithms Interesting practical examples are discussed and useful problems are explored This updated second edition includes new homework problems and revises the scripts in the book available functions and m files to MATLAB V7

Voice Recognition Richard L. Klevans, Robert D. Rodman, Robert Rodman, 1997 Here s a scientific look at computer generated speech verification and identification its underlying technology practical applications and future direction You get a solid background in voice recognition technology to help you make informed decisions on which voice recognition based software to use in your company or organization It is unique in its clear explanations of mathematical concepts as well as its full chapter presentation of the successful new Multi Granular Segregating System for accurate context free speech identification
