Cutler, 2007-12-01 In recent years the hospital industry has been undergoing massive change and reorganization with technological innovations and the spread of managed care As a result the total number of hospitals countrywide has been declining and a growing number of not for profit hospitals have converted to for profit status These changes raise two fundamental questions What determines a hospital s choice of for profit or not for profit organizational form And how does that form affect patients and society This timely volume provides a factual basis for discussing for profit versus not for profit ownership of hospitals and gives a first look at the evidence about new and important issues in the hospital industry The Changing Hospital Industry Comparing Not for Profit and For Profit Institutions will have significant implications for public policy reforms in this vital industry and will be of great interest to scholars in the fields of health economics public finance hospital organization and management and to health services researchers *The Nonprofit Economy* Burton Weisbrod, 1988 Nonprofit organizations are all around us Written in a clear direct style without technicalities The Nonprofit Economy is addressed to a broad audience and deals comprehensively with what nonprofits do how well they do it how they are financed and how they interact with private enterprises and government *The Governance of Not-for-Profit Organizations* Edward L. Glaeser, 2007-11-01 Not for profit

organizations play a critical role in the American economy In health care education culture and religion we trust not for profit firms to serve the interests of their donors customers employees and society at large We know that such firms don't try to maximize profits but what do they maximize This book attempts to answer that question assembling leading experts on the economics of the not for profit sector to examine the problems of the health care industry art museums universities and even the medieval church Contributors look at a number of different aspects of not for profit operations from the problems of fundraising endowments and governance to specific issues like hospital advertising The picture that emerges is complex and surprising In some cases not for profit firms appear to work extremely well competition for workers customers and donors leads not for profit organizations to function as efficiently as any for profit firm In other contexts large endowments and weak governance allow elite workers to maximize their own interests rather than those of their donors customers or society at large Taken together these papers greatly advance our knowledge of the dynamics and operations of not for profit organizations revealing the under explored systems of pressures and challenges that shape their governance

Sharpe, 2004-09-07 According to a recent Institute of Medicine report as many as 98 000 Americans die each year as a result of medical error a figure higher than deaths from automobile accidents breast cancer or AIDS That astounding number of fatalities does not include the number of those serious mistakes that are grievous and damaging but not fatal Who can forget the tragic case of 17 year old Jessica Santillan who died after receiving a heart lung transplant with an incompatible blood type What can be done about this What should be done How can patients and their families regain a sense of trust in the hospitals and clinicians that care for them Where do we even begin the discussion Accountability brings the issue to the table in response to the demand for patient safety and increased accountability regarding medical errors In an interdisciplinary approach Virginia Sharpe draws together the insights of patients and families who have suffered harm institutional leaders galvanized to reform by tragic events in their own hospitals philosophers historians and legal theorists Many errors can be traced to flaws in complex systems of health care delivery not flaws in individual performance How then should we structure responsibility for medical mistakes so that justice for the injured can be achieved alongside the collection of information that can improve systems and prevent future error Bringing together authoritative voices of family members health care providers and scholars from such disciplines as medical history economics health policy law philosophy and theology this book examines how conventional structures of accountability in law and medical structure structures paradoxically at odds with justice and safety should be replaced by more ethically informed federal state and institutional policies Accountability calls for public policy that creates not only systems capable of openness concerning safety and error but policy that also delivers just compensation and honest and humane treatment to those patients and families who have suffered from harmful medical error *The PDMA ToolBook 3 for New Product Development* Abbie Griffin, Stephen Somermeyer, 2007-09-28 The book is the third volume covering the best practices of product

development and is a follow up to the successful PDMA ToolBook1 published in 2002 and PDMA ToolBook2 published in 2004.
