Kumar Bisht,Vijay Singh Meena,Pankaj Kumar Mishra,Arunava Pattanayak,2016-11-15 This book showcases a compilation of  
case studies presented by scientists teachers and academics and covers contemporary technologies for combating climate  
change including sustainable agricultural management practices and conservation agriculture It highlights the situations  
that future generations in the Indian Himalayas will face and addresses the major challenges for tomorrow s generations in  
their efforts to ensure sufficient food production for the global population It also sheds light on the factors that are routinely  
ignored in connection with agricultural management practices for sustainable food production and risk assessment Lastly it  
illustrates the need to develop a comprehensive master plan for strategic planning including conservation agriculture  
practices that address poverty and food security in the wake of climate change impacts      □□□□□□ ,1994-04      **Chinese  
Capitalism in Southeast Asia** Yos Santasombat,2017-09-04 This collection examines the historically and geographically  
specific form of economic organization of the overseas Chinese in Southeast Asia and how it has adapted to the different  
historical and socio political contexts of Southeast Asian countries Moving beyond cultural explanations and traits to focus on  
the process of evolution and dynamism of situated practices it argues that Chinese Capitalism is rapidly becoming a form of  
hybrid capitalism and embodies the interdependent of culturally and institutionally specific dynamics at local and regional  
level evolving and adapting to different institutional contexts and politico economic conditions in the host Asian economies  
This text also explores the social organization and political economy of the so called overseas Chinese by examining the  
changing dynamism of Chinese capitalism in relation to forces of globalization Focusing on key actors primarily Chinese  
entrepreneurs in their business practices and situated practices as well as cultural political social and economic factors  
under globalizing conditions it provides providing a broad understanding without fixating or homogenizing Chinese  
capitalism contributing to the understanding of the contexts that give rise to the emergence and transformation of Chinese  
Capitalism in Southeast Asia      **Artificial Intelligence and Inclusive Education** Jeremy Knox,Yuchen Wang,Michael  
Gallagher,2019-06-13 This book brings together the fields of artificial intelligence often known as A I and inclusive education  
in order to speculate on the future of teaching and learning in increasingly diverse social cultural emotional and linguistic  
educational contexts This book addresses a pressing need to understand how future educational practices can promote

equity and equality while at the same time adopting A I systems that are oriented towards automation standardisation and efficiency The contributions in this edited volume appeal to scholars and students with an interest in forming a critical understanding of the development of A I for education as well as an interest in how the processes of inclusive education might be shaped by future technologies Grounded in theoretical engagement establishing key challenges for future practice and outlining the latest research this book offers a comprehensive overview of the complex issues arising from the convergence of A I technologies and the necessity of developing inclusive teaching and learning To date there has been little in the way of direct association between research and practice in these domains A I has been a predominantly technical field of research and development and while intelligent computer systems and smart software are being increasingly applied in many areas of industry economics social life and education itself a specific engagement with the agenda of inclusion appears lacking Although such technology offers exciting possibilities for education including software that is designed to personalise learning or adapt to learner behaviours these developments are accompanied by growing concerns about the in built biases involved in machine learning techniques driven by big data
