When the prosecution introduces confession testimony during a criminal trial the effect is usually overwhelming In fact jurors verdicts are affected more by a confession than by eyewitness testimony While eyewitness studies are massive in numbers the topic of confession evidence has been largely ignored by psychologists and other social scientists *Confessions in the Courtroom* seeks to rectify this discrepancy This timely book examines how the legal system has evolved in its treatment of confessions over the last half century and discusses at length the U S Supreme Court s decision regarding *Arizona v Fulminante* which caused a reassessment of the acceptability of confessions generated under duress The authors examine the causes of confessions and the interrogation procedure used by the police They also evaluate the process for determining the admissibility of confession testimony and provide excellent research on jurors reactions to voluntary and coerced confessions Social scientists attorneys members of the criminal justice system and students will find *Confessions in the Courtroom* to be an objective and readable treatment on this important topic In this short volume the authors seek to describe and evaluate what we know about confessions given to police and their impact at the subsequent trial It is a comprehensive review of the social psychological literature and legal decisions surrounding confessions One of the primary strengths of the manuscript is the interplay between social science and law fostered by the authors clear understanding of the boundaries between these disciplines and appreciation of the substantive areas they share The authors have produced a comprehensive and imminently readable legal and psychological treatise on confessions valuable for established scholars and for students *Journal of Contemporary Criminal Justice* *Foreign Trade*, 1972 Detailed analysis by products **The Psychology of Evidence and Trial Procedure** Saul M. Kassin, Lawrence S. Wrightsman, 1985 Kassin and Wrightsman s book concentrates on the single most important determinant of verdicts the evidence and court procedure The book is divided into four parts an overview and historical perspective and a definition of the empirical issues that concern psychologists seven substantive topics that are practically important theoretically interesting and always controversial like eyewitness accounts confessions polygraph tests and character evidence an examination of the major stages of trial procedure a provocative discussion of the role that psychology does and should play in the judicial process The book should have a broad appeal especially since the chapters are written in non technical accessible language All the contributors are

leading scholars in their fields **PPM Star Catalogue: Zones +200 to -00** Siegfried Röser,Ulrich Bastian,Astronomisches Rechen-Institut, Heidelberg,1991 *Police Interrogations and False Confessions* G.
