Diamond,2006-01-03 The Development of an Extraordinary Species We human beings share 98 percent of our genes with chimpanzees Yet humans are the dominant species on the planet having founded civilizations and religions developed intricate and diverse forms of communication learned science built cities and created breathtaking works of art while chimps remain animals concerned primarily with the basic necessities of survival What is it about that two percent difference in DNA that has created such a divergence between evolutionary cousins In this fascinating provocative passionate funny endlessly entertaining work renowned Pulitzer Prize winning author and scientist Jared Diamond explores how the extraordinary human animal in a remarkably short time developed the capacity to rule the world and the means to irrevocably destroy it Why Is Sex Fun? Jared Diamond,2014-03-20 A fascinating insight into how human sexuality came to be the way it is now Jared Diamond explains why we are different from the animal kingdom Why are humans one of the few species to have sex in private Why do humans have sex any day of the month or year including when the female is pregnant beyond her reproductive years or between her fertile cycles Why are human females one of the few mammals to go through menopause Human sexuality seems normal to us but it is bizarre by the standards of other animals Jared Diamond argues that our strange sex lives were as crucial to our rise to human status as were our large brains He also describes the battle of the sexes in the human and animal world over parental care and why sex differences in the genetic value of parental care provide a biological basis for the all too familiar different attitudes of men and women towards extramarital sex *Aussenhandel* ,1980
