different ways in which policy has evolved in various European countries The concluding chapter draws together some of the

issues and makes use of cutting edge data to provide a set of universal tools to analyse and inform policy at all levels It

description of the paper and not the actual abstract This literature review uncovers common conclusions about the effects of integration on location When high trade costs prevent strong spatial interactions the size and characteristics of the local market and factor availability determine what is produced where Initially economic integration diminishes the importance of such considerations and for intermediate trade costs creates a putty clay geography there is a priori great flexibility on where particular activities locate but once spatial differences take shape pecuniary externalities make these quite rigid However for low trade costs the weight of location shifts back to local underlying characteristics But what matters then is good local availability not of all goods and factors but of those whose mobility has been less improved by globalization
