The Swift Path Panchen Losang Yeshe, 2023-03-14 This collection of guided meditations from eighteenth century Tibet harnesses elements of tantric visualization to induce realizations while contemplating the steps on the path to buddhahood The Swift Path by the Second Panchen Lama has long been heralded in the Geluk school of Tibetan Buddhism as one of the eight great lamrim or works presenting the stages of the path to enlightenment but it is the last to become widely available in English translation Composed by a preceptor of two Dalai Lamas this practical and systematic guide to meditating on the lamrim is based on the Easy Path a more concise work by the First Panchen Lama In The Swift Path Panchen Losang Yeshe expands on the earlier Panchen Lama's meditation guide with more detailed instructions on how to generate a clear and profound experience of the key recognitions that allow us to advance on our spiritual journey These include the recognition of the opportunity afforded by our human existence both its preciousness and its precariousness and the way to adopt and live out the practices of a bodhisattva The guided meditations here make use of a visualization of one's teacher in the guise of Sakyamuni Buddha to unlock our own innate potential for buddhahood complete enlightenment to best benefit humanity and all living beings

Hudson, Hans Middelkoop, 2015-04-29 This volume provides a comprehensive perspective on geomorphic approaches to management of lowland alluvial rivers in North America and Europe Many lowland rivers have been heavily managed for flood control and navigation for decades or centuries resulting in engineered channels and embanked floodplains with substantially altered sediment loads and geomorphic processes Over the past decade floodplain management of many lowland rivers has taken on new importance because of concerns about the potential for global environmental change to alter floodplain processes necessitating revised management strategies that minimize flood risk while enhancing environmental attributes of floodplains influenced by local embankments and upstream dams Recognition of the failure of old perspectives on river management and the need to enhance environmental sustainability has stimulated a new approach to river management The manner that river restoration and integrated management are implemented however requires a case study approach that takes into account the impact of historic human impacts to the system especially engineering The river basins examined in this volume provide a representative coverage of the drainage of North America and Europe taking into account a range of climatic and physiographic provinces They include the 1 Sacramento California USA 2 San Joaquin California 3 Missouri Missouri USA 4 Red Manitoba Canada and Minnesota USA 5 Mississippi Louisiana USA 6 Kissimmee Florida USA 7 Ebro Spain 8 Rhone France 9 Rhine Netherlands 10 Danube Romania and 11 Volga Russian Federation Rivers The case studies covered in these chapters span a range of fluvial modes of adjustment including sediment channel hydrologic regime floodplains as well as ecosystem and environmental associations *The RRB Quarterly Review* United States.
