## 8011798:

*John Napier* Julian Havil, 2014-10-05 The most comprehensive account of the mathematician's life and work John Napier 1550-1617 is celebrated today as the man who invented logarithms an enormous intellectual achievement that would soon lead to the development of their mechanical equivalent in the slide rule the two would serve humanity as the principal means of calculation until the mid 1970s Yet despite Napier's pioneering efforts his life and work have not attracted detailed modern scrutiny John Napier is the first contemporary biography to take an in depth look at the multiple facets of Napier's story his privileged position as the eighth Laird of Merchiston and the son of influential Scottish landowners his reputation as a magician who dabbled in alchemy his interest in agriculture his involvement with a notorious outlaw his staunch anti-Catholic beliefs his interactions with such peers as Henry Briggs Johannes Kepler and Tycho Brahe and most notably his estimable mathematical legacy Julian Havil explores Napier's original development of logarithms the motivations for his approach and the reasons behind certain adjustments to them Napier's inventive mathematical ideas also include formulas for solving spherical triangles Napier's Bones a more basic but extremely popular alternative device for calculation and the use of decimal notation for fractions and binary arithmetic Havil also considers Napier's study of the Book of Revelation which led to his prediction of the Apocalypse in his first book *A Plaine Discovery of the Whole Revelation of St John* the work for which Napier believed he would be most remembered John Napier assesses one man's life and the lasting influence of his advancements on the mathematical sciences and beyond
